

Plugin Google Doc

This [wiki plugin](#), introduced in [Tiki3](#), allows you to include a document from the [Google Docs](#) service in a page.

Parameters

Tiki Doc From Code error: googledoc not found

Google Key

The most important parameter is the Google key. One way to find it is, on your documents list, click-right and go to "Get Link". You will see an URL to share your document. This URL contains the Google document key and you need to copy it to the plugin.

IE (the key is in red colour):

https://docs.google.com/forms/d/1fq6Uq8fwhTV7mvt5iy_dkUE6MtLGJRck37VKJQNzTI/edit?usp=sharing

Note that on the same modal dialog you will be able to see who has right to see the document.

Examples

Basic syntax

```
{googledoc key="pXsHENf1bGGY92X1iEeJJI" type="spreadsheet" name="docFrame1" width="400" height="500" align="middle" frameborder="0" marginheight="5" marginwidth="5" scrolling="yes" editLink="both"}
```

In case you select drive the key is not required, but you must provide the Google Drive link of your file.

Note that type drive does not support *documents*, *spreadsheets*, *forms*, or *slides*, better to select a type that meets the requirements.

```
{googledoc key="pXsHENf1bGGY92X1iEeJJI" type="drive" name="docFrame1" url="https://drive.google.com/file/d/1fq6Uq8fwhTV7mvt5iy_dkUE6MtLGJRck37VKJQNzTI/view" scrolling="yes"}
```

Quick Edit a Wiki Page

[Create/Edit](#)

TikiWiki Assistant

Thank you for installing TikiWiki!

To configure your Tiki:
 Select [Admin](#) > [Admin home](#) from the menu.
 Read the [configuration documentation](#).
 Watch the [demo movie](#).

To remove this module:
 Select [Admin](#) > [Modules](#) and remove the assistant module. You can also add other modules.

To customize the menu:
 Select [Admin](#) > [Menus](#) and edit menu ID 42.
 Or create your own menu and add it to a module.
