

Tiki has a help feature (preference name: feature_help) which activates links from within the application to the Tiki documentation. You can specify a Help URL that contains customized help pages. By default, the Help system uses <http://doc.tiki.org/>

In tiki-admin.php, there are help links which lead to doc.tiki.org

Print Settings

Settings and features for print versions and pdf generation

PDF settings

PDF from URL

Disabled

Printing to PDF memory limit

for example: 256M

Printing to PDF time limit

Slideshow (reveal.js) PDF export

As features are added (or in some cases renamed).

All the links from [Tiki instances of all currently supported versions should work](#)

The information below is to help coordinate this process

This page is to list all the pages which are linked from the application. This is supposed to be approximately the same list as [Keywords](#).

Along with [All Plugins](#) and [All modules](#), we should try to make sure all these links actually point to somewhere. At least with a [stub](#) so users can become contributors.

Hard-coded help page links

To generate

```
grep -r '{\$prefs.helpurl}' templates | sed -e "s/^\.*{\$prefs.helpurl}([\^\"']*)([\"'].*$/\1/" | sort | uniq | awk '{print "(""$1")~|~\~|~"}' | tr "+" " "
```

The pages

See: Restore Help Pages 7x

For 3.x, we are missing 1- the doc links with the new format {help url= 2- the links in tiki-admin.php Also, the script needs to be double-checked for links with spaces () or pluses (+)

(cont'd)	(cont'd)	(cont'd)
	(cont'd)	(cont'd)

On 13th March 2005, v1.9 had over 210 links to doc.tw.o, and over 120 links to unique pages on doc.tw.o!

Finding templates with bad help links

To find templates with bad help links:

```
lhelp.sh
```

```
#!/bin/bash find templates -exec egrep "helpurl.*\${1}" {} \; -print
```

Help links from Admin Configuration panel

This section needs a serious cleanup for 3.x (and maybe even 2.x?)

```
egrep "adminPage|+Config" tiki-admin.php sections="Tiki Features General Login Wiki Image+Galleries File+Galleries
Articles Polls Search Blog Forum FAQ Tracker Webmail RSS Directory User+Files Maps Meta+Tags wikiatt Score Projects
Community Site+Identity Site+Logo+and+Identity Calendar" for each in $sections; do echo "("${each}"+Config)~|~ ~|~" | tr
"+" " "; done
```

Links from tw.o to doc.tw.o

The following link to doc.tw.o from tw.o:

ldoc.sh

```
#!/bin/bash grep "doc:" | sed -e "s/^\.*\(((doc:[^)]*)\).*$/1/g" \$1 | sort | uniq grep "[http://doc.tikiwiki.org" | sed -e "s/^\.*\([http://doc.tikiwiki.org[^]]*\).*$/1/g" \$1 | sort | uniq
```

```
./ldoc.sh tikiwiki.org.2005-03-07.sql
```

Links from plugins (Needs to be done)

plugins have internal link to doc in the plugin.php file. Ex.: 'documentation' => 'PluginMouseover',
