

Share

Introduced in [Tiki6](#), this feature allows sending messages to [Social Networks](#), as well as internal messages or forum posts to alert on some wiki page in your Tiki site, etc.

How to use Share

Enable the Feature:

Admin home > Features > Global Features > Additional > Share

Admin Share

To access: Click the **Share** icon  on the [Admin Panel](#) or access <http://example.org/tiki-admin.php?page=share>

Set it up in the Share admin panel:

The screenshot shows the 'Share' configuration page in the Tiki Admin interface. At the top, there are navigation tabs for 'Advanced', 'Access', 'Content', 'System', and 'Tools', along with a search bar for preferences. Below this is a grid of icons representing various system features. The 'Share' feature is highlighted with a blue circle. Underneath, the 'Share' feature is listed with a status of 'advanced' and a set of icons. Below that, the 'Site-wide features' section contains several options, each with a checkbox and a status indicator: 'Display links on the share page' (checked, advanced), 'Token notification' (unchecked, advanced), 'Add contact' (unchecked, advanced), 'Display name and email' (checked, advanced), and 'Number of times accessed' (unchecked, advanced). There are 'Apply' buttons at the end of both the 'Share' and 'Site-wide features' sections.

Click to expand

Once enabled the feature, all pages will have a new icon on the top right corner, to allow the user to share this page with others:

The screenshot shows the Tiki HomePage. The top left corner features the 'tiki wiki cms groupware' logo. A 'System Menu' is visible on the left side. The main content area displays 'HomePage Congratulations' and 'Get started.' instructions. In the top right corner, there is a 'Page actions' menu with options for 'Edit', 'Edit icons', and 'Share'. The 'Share' option is circled in red, indicating its presence on the page.

Click to expand

Once you click there, you will be offered some options to share the page with, depending on the associated features (internal or related to external social networks) which are already enabled and configured in your site.

Share with access rights

This feature is useful when sharing content that is not publicly available. The recipients will inherit user's access rights for the shared resource only.

Preferences required: `auth_token_access` and `auth_token_share`.
