

Share

Introduced in [Tiki6](#), this feature allows sending messages to [Social Networks](#), as well as internal messages or forum posts to alert on some wiki page in your Tiki site, etc.

How to use Share

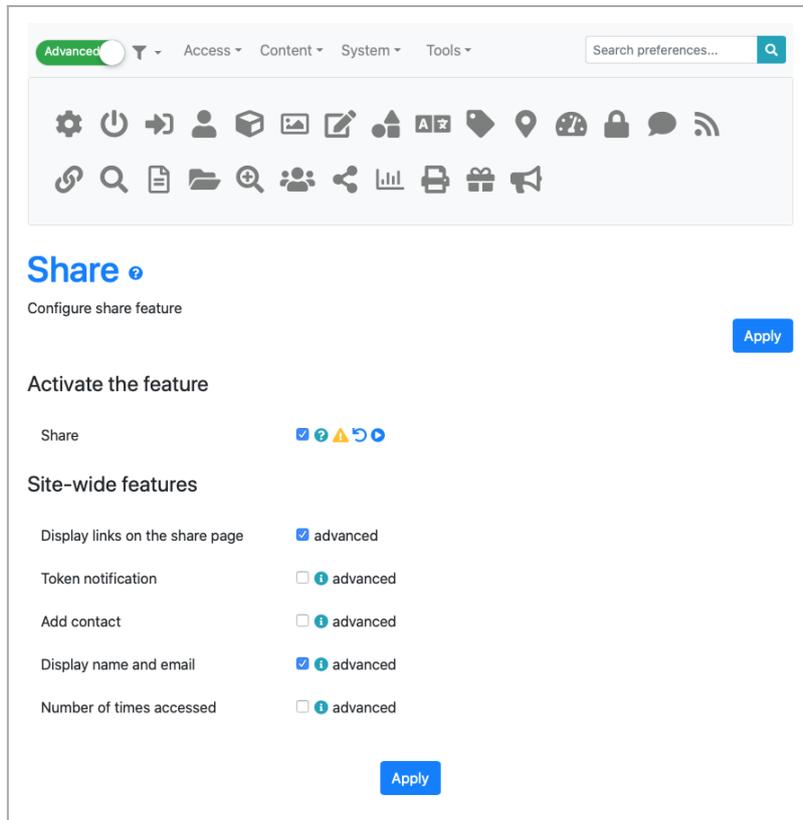

Enable the Feature:

Admin home > Features > Global Features > Additional > Share

Admin Share

To access: Click the **Share** icon  on the [Admin Panel](#) or access <http://example.org/tiki-admin.php?page=share>

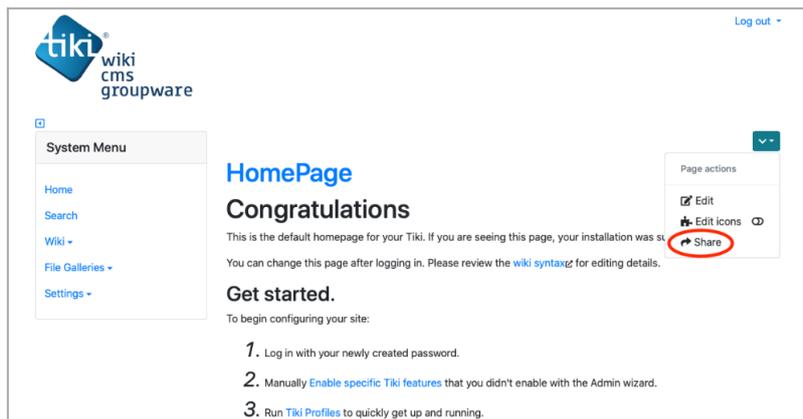

Set it up in the Share admin panel:

The screenshot shows the 'Share' configuration page in the Tiki Admin interface. At the top, there is a navigation bar with tabs for 'Advanced', 'Access', 'Content', 'System', and 'Tools', along with a search box for preferences. Below the navigation bar is a grid of icons representing various system features. The main content area is titled 'Share' and includes a sub-header 'Configure share feature' and an 'Apply' button. Under 'Activate the feature', the 'Share' checkbox is checked, accompanied by icons for social media and sharing. The 'Site-wide features' section contains several options, each with a checkbox and a 't' icon for advanced settings: 'Display links on the share page' (checked), 'Token notification' (unchecked), 'Add contact' (unchecked), 'Display name and email' (checked), and 'Number of times accessed' (unchecked). An 'Apply' button is located at the bottom right of the configuration area.

Click to expand

Once enabled the feature, all pages will have a new icon on the top right corner, to allow the user to share this page with others:

The screenshot shows the Tiki 'HomePage' with a 'Congratulations' message. The page features a 'System Menu' on the left with links for Home, Search, Wiki, File Galleries, and Settings. The main content area includes a 'Get started.' section with three numbered steps: 1. Log in with your newly created password. 2. Manually Enable specific Tiki features that you didn't enable with the Admin wizard. 3. Run Tiki Profiles to quickly get up and running. In the top right corner, there is a 'Page actions' menu with options for 'Edit', 'Edit icons', and 'Share'. The 'Share' option is highlighted with a red circle, indicating its presence on the page.

Click to expand

Once you click there, you will be offered some options to share the page with, depending on the associated features (internal or related to external social networks) which are already enabled and configured in your site.

Share with access rights

This feature is useful when sharing content that is not publicly available. The recipients will inherit user's access rights for the shared resource only.

Preferences required: `auth_token_access` and `auth_token_share`.
