

A new tracker field type in [Tiki22](#)

## Duration Tracker Field

Provide a convenient way to enter time duration in different units. It is highly advisable to turn on Vue.js integration on for a better user interface. (Control panels, features, interface: vuejs)

See also [Date Tracker Fields](#)

### Parameters

| Parameter          | value     | description                                                                         | version |
|--------------------|-----------|-------------------------------------------------------------------------------------|---------|
| <b>Seconds</b>     | yes or no | Allow selection of seconds.                                                         | 22      |
| <b>Minutes</b>     | yes or no | Allow selection of minutes.                                                         | 22      |
| <b>Hours</b>       | yes or no | Allow selection of hours.                                                           | 22      |
| <b>Days</b>        | yes or no | Allow selection of days.                                                            | 22      |
| <b>Weeks</b>       | yes or no | Allow selection of weeks.                                                           | 22      |
| <b>Months</b>      | yes or no | Allow selection of months.                                                          | 22      |
| <b>Years</b>       | yes or no | Allow selection of years.                                                           | 22      |
| <b>Chronometer</b> | yes or no | Add chronometer type of UI with start/stop and reset buttons to count elapsed time. | 22      |
