Unexpected 1.7.5 to be released!  
By: Damian Parker on: Mon 15 Dec, 2003 [11:50 UTC] (42 reads)

A unplanned 1.7.5 has been drawn up for the 1.7 TikiWiki release family. This is only a bugfix release and will not contain any new features.

 ANNOUNCE

(398 bytes)

Please review the [ReleaseProcess175](#) page for more details. This release is managed by [Damian](#), please contact me via [Tiki Mail](#) if you have any bugfixes we can include in this release.

A release date will be issued on [ReleaseProcess175](#) once I have gathered enough information about suggested bugfixes for this release.
