

# Auto TOC

Starting in Tiki12, a new feature to allow adding an automatic Table Of Contents ("Auto TOC") has been added to the Wiki. And starting in Tiki23, you can have more options via PluginAutoTOC

# Enable it

Auto-toc can be enabled as admin through the admin panel in "**Admin home > Wiki > General Preferences (Tab)**  
**> Section *Automatic table of contents (Page Display before Tiki 15) > Wiki auto-toc***"

You can also choose:

- the default for each page (which can be overridden per page)
- If the top TOC should be inserted into the page content or not
- Position left or right
- Offset from the top

Automatic table of contents

Click to expand

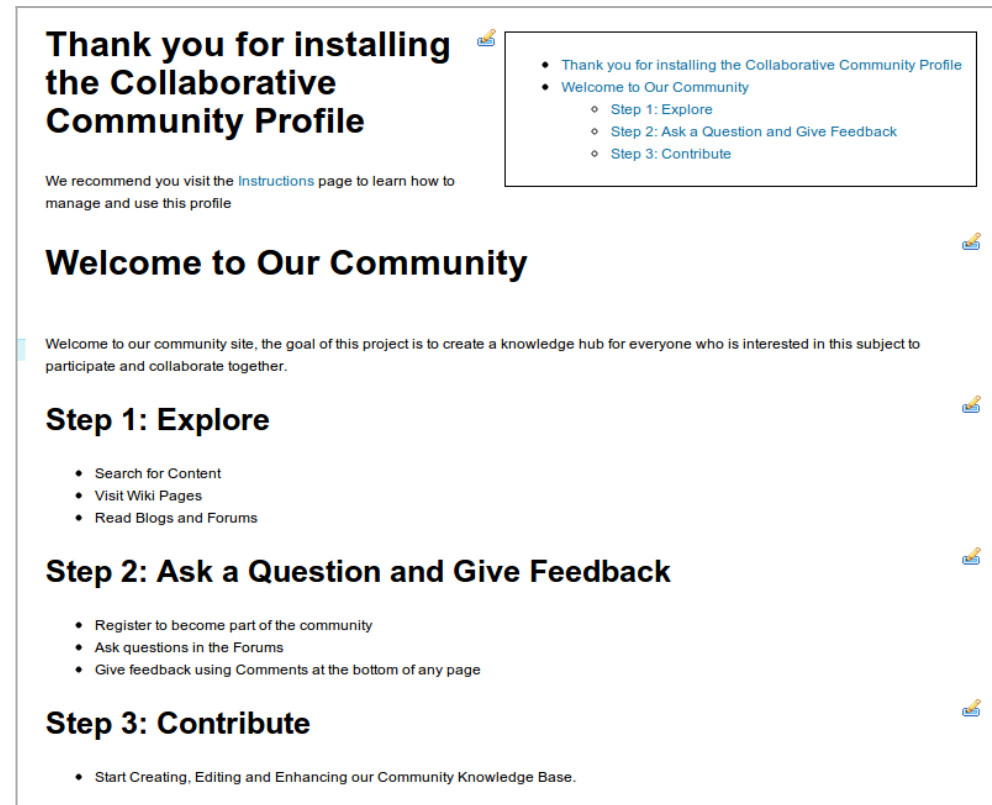

Auto TOC is not included in the print view of the page.

# Usage

Auto-toc will add the TOC in two places.

1. A static TOC located at the top of the page. The TOC is inserted into the page content at runtime.

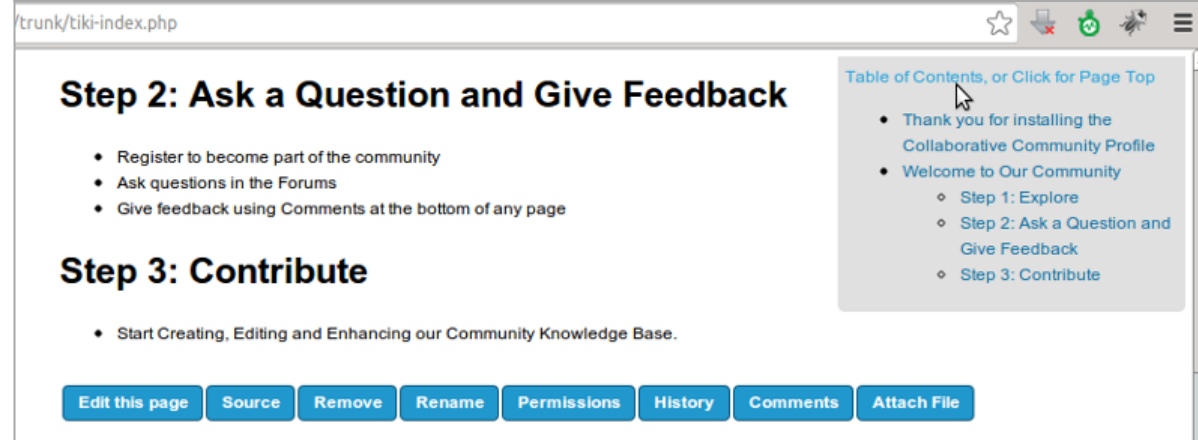

• Example:

Click to expand

2. A floating TOC, located at the top of the browser window. This TOC is only visible when you scroll down past the top of the page.

• Example:

Click to expand

Additionally, you can also see it in action in the screencast below.

```
{flash type="url" movie="https://dev.tiki.org/display372" width="550" height="500"}
```

# Disable it in some pages

You can disable it in some wiki pages. In order to do so, edit the page, go to the properties tab, and set "**Page display options > Automatic Table of Contents generation**" to "**off**":

## Edit: HomePage

The screenshot shows the 'Edit: HomePage' interface with the following elements:

- Buttons:** 'Edit page', 'Properties', and 'No Tabs'.
- Apply template:** A dropdown menu showing 'none' and a link to 'Admin Content Templates'.
- Upload file:** A section with a button 'Selecciona el fitxer', a text input 'Cap fitxer seleccionat.', a 'Comment:' label, and an 'Attach' button.
- Language:** A dropdown menu showing 'English (en)' and a note: 'To translate, do not change the language and the content. Instead, [create a new translation in the new language.](#)'
- Page display options:** A section containing two items:
  - 'Automatic Table of Contents generation' with a dropdown menu set to 'Off' (highlighted by a red rectangle).
  - 'Show page title' with a dropdown menu.
