

# Blogs Config

# Admin Access

To access administration, go to **Home Page** and, on the **Menu**, click on "**Admin (click!)**".

# Sections: Tiki Admin Panel

You will access the **Sections** Tiki Config Panel , as shown in this graphics:

# Blog settings

Blogs

..

From the Tiki Config Panel, click the Blogs icon to display its settings panel, the top of which appears like so:

# Home Blog (main blog)

The Home Blog will have the following properties:

- If not selected it will default to the first blog created.
- It's where you go if you click on blogs in the main menu (without expanding the menu).
- It's where you go as the home page if you select the home page to be a blog (in the general settings).

# Blog features

Enable/disable rankings/comments and you can select which is the Home Blog.

# Blog listings configuration

# Blog comments settings

# Blog Archives

You can see the blog archives using the module **months\_links**, which will also allow you to see links for other years posts.

|   |  |  |
|---|--|--|
| <div>Archives</div> <div>July 2010 (1)</div> <div>June 2010 (4)</div> <div>May 2010 (3)</div> <div>April 2010 (2)</div> | <div>Archives</div> <div>Juillet 2010 (1)</div> <div>Juin 2010 (4)</div> <div>Mai 2010 (3)</div> <div>Avril 2010 (2)</div> | <div>Архивы</div> <div>Июль 2010 (1)</div> <div>Июнь 2010 (5)</div> <div>Апрель 2010 (1)</div> |
| Module shown when <b>English</b> is selected as language  | Module shown when <b>French</b> is selected as language  | Module shown when <b>Russian</b> is selected as language                                       |
| Note that the number of blog posts per year can vary depending on the language  |  |  |

In order to have this module configured, you have to add some paramters as in the screenshot below:

| Right Modules   |       |       |      |   |           |   |
|-----------------|-------|-------|------|---|-----------|---|
| Name            | Order | Cache | Rows | Parameters                                | Groups    | Action  |
| last_blog_posts | 2     | 0     | 10   | title=Latest+Comments&nonums=y            | Anonymous |       |
| months_links    | 31    | 0     | 10   | feature=blogs&id=1&lang=en&title=Archives | Anonymous |      |
| months_links    | 32    | 0     | 10   | feature=blogs&id=2&lang=fr&title=Archives | Anonymous |      |
| months_links    | 33    | 0     | 10   | feature=blogs&id=3&lang=ru&title=Архивы   | Anonymous |       |

So this way, each language can have a module specific for that language, showing the posts of that blog (one blog per language), for a given time frame, specified in the parameters of the module definition.

In addition, you can show blog posts between two dates in a wiki page using the Blog list plugin, with the parameters for start date and end date.
