

Country Selector

One of the Selector Tracker Fields, the country selector is a field in a tracker that refers to a country. The country selection will be done by selecting a country in a drop down list.

Options	Explanation
1 or 2	1 displays only country name, 2 displays country name and flag

Display limitation:

tikiwiki>=1.10

If you want to display only some countries for a country selector field, you can check the list you want while defining the field.

Alias:

- Country Selector Tracker Field
