Step 1

tiki-admin.php?page=search -> General Settings -> Don't index non searchable fields
ndexing will skip adding all tracker fields that are not marked as "searchable". This will free index space but also mak
it impossible to use those fields in search index queries.
Preference name: unified_exclude_nonsearchable_fields

Step 2

Then, go to the list of fields in each tracker, and toggle the value for the "Search" column.

Step 3

Rebuild Unified Index
