Groups Management

For general information about the group feature see group.

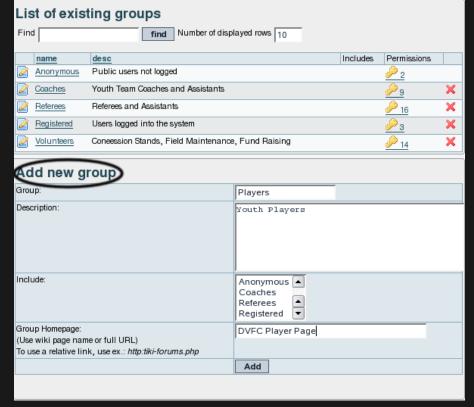

RELATED PAGES

group, user permissions, permissions, category, admin

Creating Groups

To create a group:

- Expand the Admin drop down:
- Click on Groups, you'll see the page below

- Fill in the form with the group name and description
- If the group you are creating should be included as a sub-group of another group, use the include box to choose the group or group that the new group should be a part of.

Note: By default, all groups will include the **Registered** group.

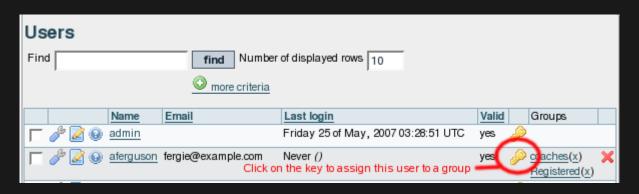

- If the group should have it's own homepage, put the wiki page name or full URL in the Home Page Box (Do not forget to have checked 'Use group homepages' in admin->general). Special value: the user homepage prefix (ex: UserPage) can be use to redirect a user to his homepage at login.
- When all fields have been filled in click the Add button. The form will refresh and you group will appear in the new list (see below)

• Group Default Category(Default category assigned to objects edited by a group user):

(tw>=1.10)If a user with a default group (do not forget to set the default group for each user) edits (create or modify) an object and save the object without putting a category, the specified category is automatically assign to the object.

Assigning users to groups.

From the user administration screen click on the gold key to the right of the user line.

The assign user form will be opened (see below)

×

This form shows the user information, the group that the user already belongs to, and a list of group that the user can join. There are also shortcuts to group permissions, group admin, and user admin from this page.

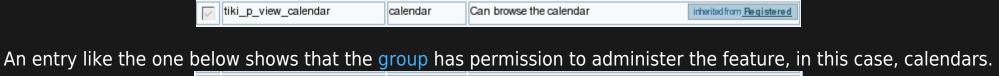

Assigning permissions to groups.

rom the group administration screen click on the gold key icon for a particular group and you will see a screen divided in two parts The first part (see below)shows the permissions that are currently set for the group.

The lower part of the screen shows all the permissions available to the group, as well as details about the currently assigned permissions.

The entry below shows that the permission has been inherited from the permissions given to registered users.

inherited from Registered admin

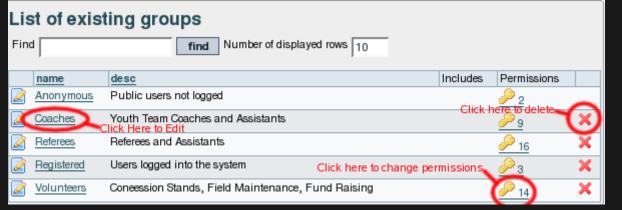

Additional permissions are assigned by clicking the checkboxes next to the permission, and then clicking the update button at the top or bottom of the page when finished.

Can browse the calendar

calendar

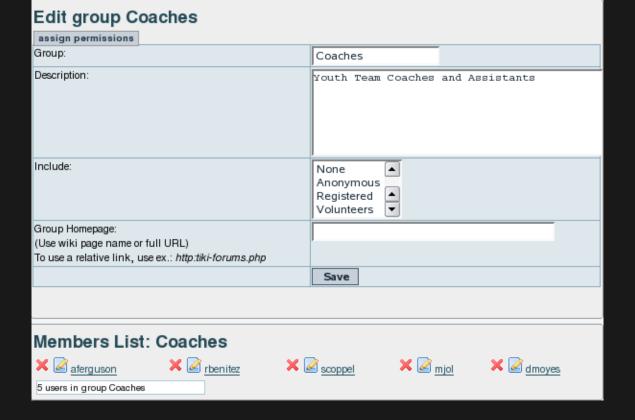

tiki_p_view_calendar

Changing or Removing Groups

- To change a group, click on the group name
- To change permissions on a group, click on the key icon
- To remove a group, click on the X.

CHANGING GROUP SETTINGS

After clicking on the group you want to change, you'll see the form above.

- To change group Name, Description, Subgroups Included, or Homepage, edit the form and click the save button.
- To remove a group member, click on the red X next to the members name. __Note!: This does not remove the user, it just takes them out of the group.

Assigning a tracker to a group

see: Group Tracker

Group Permissions

In this section you can see information for the group that you selected as name, description and permissions assigned.

Then you can create a new permission level and you can if you want assign all the permissions in some level to the group. Or emove all the permissions in some level from this group. As you can see permissions are organized in levels. By default Tiki come: with four prearranged levels that you can modify as you want:

- Basic: permissions for anonymous users, basic site usage
- Registered: permissions for logged users
- Editor: Permissions to site editors can manipulate content.
- Admin: Permissions for admins only. Can be dangerous if misused

In the second part of the screen you can assign permissions and change levels.

Г	tiki_p_create_css	registered 🔻	tiki	Can create new css suffixed with - user

The top section is used to select a permission category, for example games, forums, FAQs,etc. All can be used to see all the permissions at once (the screen will be VERY long). For each category for which permissions will be displayed the checkboxes indicate if the permission is assigned to the group or not. You can assign/remove permissions using the checkboxes; you can also thange the level of any permission using the dropdown. In this way you can re-classify the permissions as you need and then easily assign all level-x permissions to a group whenever you want.

When a user belongs to more than one group the permissions are accumulated.

Permissions

ermissions are what <mark>group</mark> CAN do. Note that permissions always ALLOW <mark>group</mark> to do things; there are no restrictive permissions i Tiki because they can conflict if the user belongs to more than one group. The list of permissions that you can assign to <mark>group</mark> are:

GENERAL PERMISSIONS

tiki_p_admin

tiki_p_use_HTML tiki p edit templates tiki p admin dynamic tiki p admin banners tiki p admin categories tiki p vote poll tiki p edit cookies

Administrator, can manage users group and permissions and all the weblog features

Can use HTML in pages

missing permissions here

LIVE SUPPORT

tiki_p_live_support_admin Admin live support system

tiki_p_live_support Can use live support system

CALENDAR

tiki_p_view_calendar

tiki_p_change_events

tiki_p_add_events

tiki_p_admin_calendar

Can browse the calendar

Can change events in the calendar

Can add events in the calendar

Can create/admin calendars

PERMISSIONS FOR INDIVIDUAL USERS

Vhat if you want to give a specific user some permissions? Just create an artificial group, assign the user to that group and give the group the permissions that you need.

INDIVIDUAL PERMISSIONS

s we explained you can set up individual permissions for some Tiki objects. When assigning individual permissions the permission you can assign are the same as you have in the global permissions screen. Once an object has individual permissions only the individual permissions apply to the object, and not the global permissions.

The following objects accept individual permissions:

Wiki pages

- Image galleries
- File galleries
- Forums
- Weblogs
- Newsletters
- Surveys
- Quizzes
- Trackers
