

Import Trackers

There are several ways to import a tracker, its fields and its data:

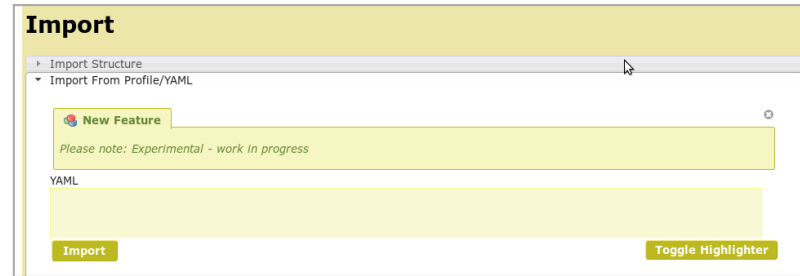

1st Way: Import Tracker using its structure (own code)

The screenshot shows the 'Trackers' application interface. At the top, there is a 'Trackers' header with a search icon and a 'Trackers' button. Below this, there are tabs for 'Trackers' and 'Duplicate/Import Tracker', with a 'No Tabs' indicator on the right. The main content area is divided into two sections: 'Duplicate Tracker' and 'Import'. The 'Duplicate Tracker' section includes a 'Name' input field, a 'Tracker' dropdown menu (currently showing 'Dynamic tracker example'), and two checkboxes: 'Duplicate categories' and 'Duplicate permissions'. A 'Duplicate' button is located below these options. The 'Import' section features a dropdown menu for 'Import Structure' (expanded to show 'Raw data'), a 'Raw data' input field, and a 'Preserve tracker ID' checkbox. A 'Note' box contains the text: 'Use "Tracker -> Export -> Structure" to produce this data.' An 'Import' button is positioned at the bottom of the 'Import' section.

Export and Import of Tracker Fields

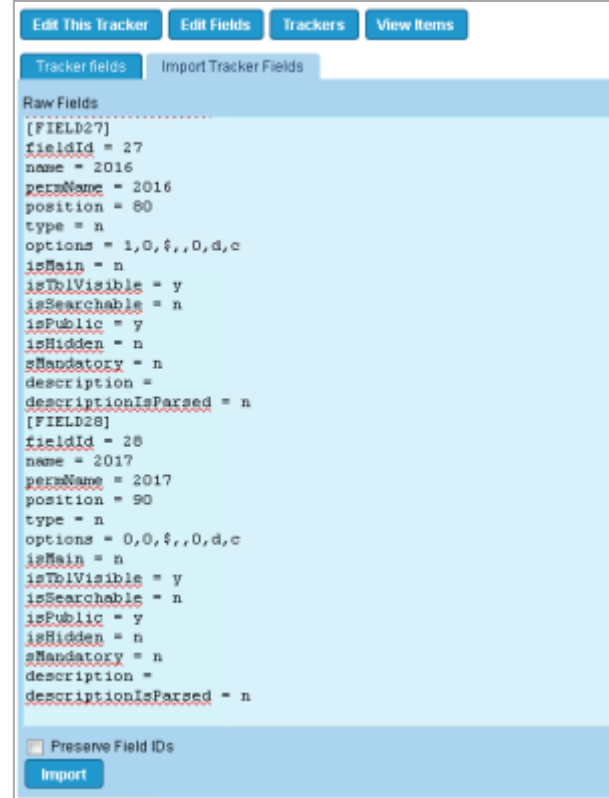

On the **Edit Fields** page (/tiki-admin_tracker_fields.php?trackerId=) you need to select all fields you want to export with the checkboxes, then at the bottom there is a dropdown where you select **Export Selected**.

The screenshot shows the 'Edit Fields' page for a tracker. At the top, there are buttons for 'Edit This Tracker', 'Edit Fields', 'Trackers', and 'View Items'. Below these are tabs for 'Trackerfields' and 'Import Tracker Fields'. The main content is a table with the following columns: ID, Name, Type, List, Title, Search, Public, Mandatory, and a delete icon (X). All rows in the table have their 'List' checkbox checked. At the bottom of the table, there is a dropdown menu with 'Export Selected' selected, and a 'Go' button next to it. The dropdown menu also shows 'Save All', 'Remove Selected', and 'Export Selected' (highlighted).

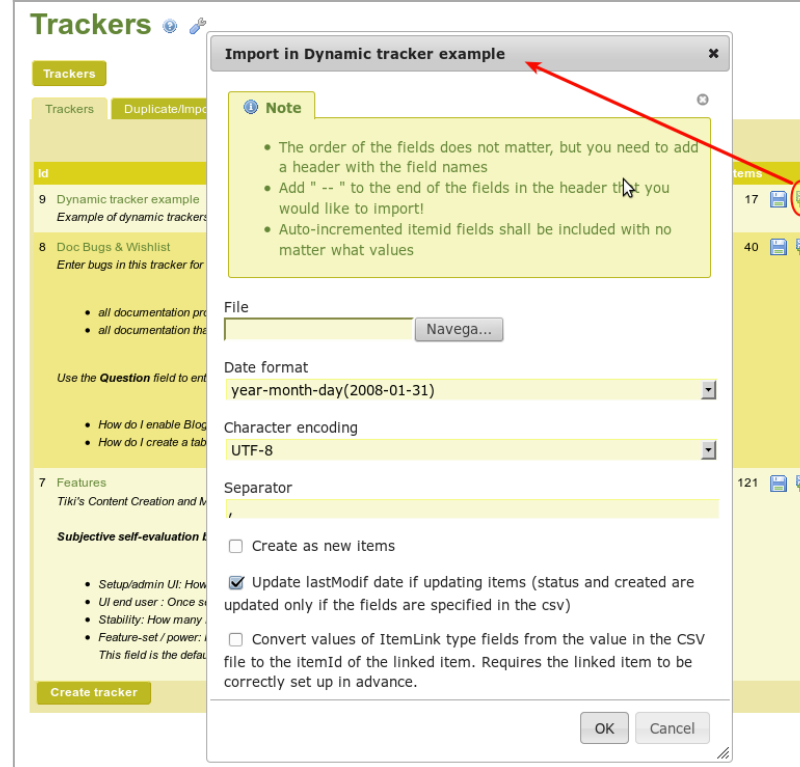

<input checked="" type="checkbox"/>	ID	Name	Type	List	Title	Search	Public	Mandatory	A

This will open a window with the code you need to copy, then paste in to the **Import Tracker Fields** tab.

Import Tracker data

To import data, you can import data through the other interface:

Click to expand

In order to get the right syntax for the file, you can export your tracker data first, so that you can see an example of how columns are data are formatted. See Export Trackers.

Use from remote sources

You can alternatively use tracker data from remote sources through the **ODBC** read/write support added in Tiki23.

See ODBC
