

# Improve TrackerÂ Forms

You can improve tracker forms enabling an experimental jquery user interface library called "**Chosen**"

## Enable theÂ feature

You can enable the feature in:

**Admin home > Features > Interface (tab) > jQuery plugins and add-ons > Experimental > jQuery-ui Chosen Menu**

The screenshot displays the 'Interface' tab of the Tracker Admin interface. The 'jQuery plugins and add-ons' section is expanded, showing various plugins. Under the 'Experimental' sub-section, the 'jQuery-ui Chosen Menu' checkbox is checked and highlighted with a red box. Other visible options include 'jQuery Infinite Carousel', 'jQuery Sortable Tables', and 'jQuery-ui Select Menu'. The 'Mobile' section at the bottom shows 'Mobile Access' is unchecked. An 'Apply' button is located at the bottom center of the form.

Remember that you need to have your "Preference Filters" in the admin panel with the "Advanced" and "Experimental" options enabled in order to see this feature checkbox.

# Drop downs

You can choose a value from a dropdown box by selecting the items in the list through scrolling down, as usual, or you can nowadays filter the list values based on the text you type at the top.

Subject \*

# Multiple selection

Similarly, a section to allow multiple selection of items can be shown in a small but enhanced dropdown box, which allows the user to select one or many of the options, remove them from the list in the text field at the top:

The screenshot shows a form with several fields. At the top, there is a dropdown menu labeled "Easy to solve?" with the value "5". Below it is a text field for "Feature" containing "Accounting" and "Article". The "Category" dropdown is expanded, showing a list of options: "Bug: Regression", "Bug: Usability", "Blocker", "Bug: conflict of two features (each works well independently)", "Bug: Consistency", "Bug: Error", "Bug: Security", "Community projects", "Documentation (or Advocacy)", "Dogfood on a \*.tiki.org site", "Feature request", and "Incident". The "Blocker" option is currently selected. At the bottom of the form, there are two checkboxes labeled "8.x" and "9.x".

# Filtering displayed options by typed text

Additionally, you can also filter the values displayed in the dropdown so that only those matching your typed text are shown in the list (only the ones starting with "D" in the example below: Documentation and Dogfood a \*.tiki.org site).

The screenshot shows a search filter interface with the following elements:

- Easy to solve?**: A dropdown menu set to '5'. Below it is a legend: '10 Easy: 5-10 minutes to fix, no risk of regression, etc. 5 Medium: a few hours 1 Difficult: Requires days of work'.
- Feature**: A text input field containing 'Accounting' and 'Article' with 'x' icons to remove them.
- Category \***: A text input field containing 'Bug: Regression', 'Bug: Usability', and 'D'. A dropdown menu is open below it, showing two filtered options: 'Documentation (or Advocacy)' and 'Dogfood on a \*.tiki.org site'. A mouse cursor is pointing at the 'D' in the input field.
- Category of**: A label for the category dropdown.
- Tiki Version**: Two checkboxes, '10.x' and '11.x', both of which are currently unchecked.
