

Module "menupage"

This [module](#) will display the content of any wiki page as a [menu](#) in the left or right column or in any other place that a module can be located.

- This type of menu is used as the upper left menu in [dev.tiki.org](#) for example.

You can also use this module in the center (main) column.

- See [Happy Scroll theme](#) for details.

Parameters

Displays a Wiki page.

*Required parameters are in **bold**.*

[Go to the source code](#)

Preferences required: feature_wiki

Parameters	Accepted Values
------------	-----------------

pagemenu	pagename
-----------------	----------

menu_class	text
-------------------	------

Description

Page to display in the menu. Example value: HomePage.

Class of the menu container

Default Since

menu_id	text
---------	------

menu_type	alpha
-----------	-------

use_namespace	int
---------------	-----

Id of the menu in the DOM

Display the page as a menu (horiz / vert)

Prepend the default namespace to the page name for localized menus per workspace (1/0)

0

Usage

On the page *Admin > Modules* (tiki-admin_modules.php)

- Assign a new module
- Choose the module "menupage" from the drop-down list.

The module will have the same title as the wiki page.

You can assign this "**menupage**" to any module zone (See [Module Admin](#) page if needed, or you can include it within a wiki page, using the [PluginModule](#)).

Example

Imagine you have a page called `SideMenu`, with this content:

```
(:arrow:) [tiki-index_raw.php|Home Page] (:arrow:) [tiki-lastchanges.php|Last changes] (:arrow:) [tiki-view_forum.php?forumId=1|Forum Wiki-translation] "[tiki-editpage.php?page=SideMenu|edit]"
```

The wiki page itself looks like this:

Then, the module **menupage**, like all modules, can be assigned to a group of users.

The assigned module looks like this:

Welcome to Wiki-Translation

 English 

Welcome to wiki-translation, a community dedicated to discussing the impact of the wiki phenomenon on the world of translation. This is a place where people interested in translation using a massively collaborative wiki paradigm, can exchange best practices and tools, and discuss how to improve them.
