

# Multimedia

Using plugins like PluginMediaPlayer or PluginFlash, tiki can play audio and video files within wiki pages, trackers and also in articles. File Gallery feature is used to upload and manage multimedia files.

# Formats

The bigger list of formats supported is shown in PluginMediaPlayer

The following formats are supported by PluginFlash:

- Mp3: Widely used MPEG 3 format for sound files.
- flv: Proprietary Flash video format by Adobe.
- Flash: Proprietary animation format.
