Shopping Cart Order Item Profile

The pagename on your Tiki for this profile cannot contain spaces

This is used for the advanced Shopping Cart feature: Record orders in trackers. To use it on your Tiki, you will need to change:

- \cdot the tracker ID
- \cdot the field IDs

• \$OrderProfile:new_order to \$WhateverTheOrderProfilePagenamels:new_order

Make sure that proper Permissions are set on the page so that it does not get edited by non-admins.
