# Major SlowdownÂ tab

**Overview**

Use this tab to configure the Tiki options tha may affect your overall performance.

**To Access**

From the Performance Admin Panel page, click the **Major Slow Down** tab.

**Note**

The features on this tab have been reported to lower overall performance, especially in high-volume sites.

| Option | Description | Default |
|---|---|---|
| Plugin ShareThis | Add a ShareThis button | Disabled |
| Log SQL | All SQL queries will be registered in the database in the tiki_sql_query_logs table. ⚠ *Do not enable this feature all the time. It can be very resource intensive and will impact performance.* | Disabled |
| Log mail in Tiki logs | A line of type mail will be included in the System Log with the destination address and subject of each email sent. ⚠ *May impact performance* | Disabled |

| Option | Description | Default |
|---|---|---|
| Smarty template usage indicator | Add HTML comment at start and end of each Smarty template (.tpl file)<br>✳ *Clear the Tiki system cache for this change to take effect.*<br>☝ *Use only for development, not in production at a live site, because these warnings are added to emails as well, and are visible to users in the page source.*<br>⚠ *May impact performance* | Disabled |
| Show category object count | Show object count when browsing categories, complying with search and type filters<br>⚠ *Can slow the loading of the categories page on large sites.* | Enabled |
| Clear cache upon category change | A cache is used to avoid having to fetch all categories from the database every time; this clears the cache when an object is categorized to keep the count up to date.<br>⚠ *Can slow saving objects on sites with a lot of categories. You may need to manually clear caches to update category object counts.* | Enabled |
| Log bytes changes (+/-) in action logs | ⚠ *May impact performance* | Disabled |
| Parse search results | When enabled search results are parsed so content formatting is visible in the search results<br>⚠ *May impact performance* | Enabled |
| Custom blog headings | ⚠ *Using custom blog headings will use significantly more server resources. Unless you need per-blog templates, you should customize the template file instead.* | Disabled |
| PHP Error reporting level | Level of errors to be reported. Errors can be seen in a collapsible box at the bottom of the page, if any exist.<br>☰ No error reporting \| Report all PHP errors except strict \| Report all PHP errors \| Report all PHP errors except notices \| According to the PHP configuration | Report all PHP errors excep... |
| Enable Typography Features | Features to replace normal characters with typographic equivalents | Disabled |
