

# Plugin Help

This is a stub

Introduced in Tiki3, this permits to fill out a form to build or edit a plugin. Thus, no need to remember or look up the syntax.

When you are editing a wiki page or any other textarea in the website, you can click on the icon to open the help popup box (1). Then you can click at the tab to show the plugin help (2), and filter the list of plugins for some keyword ("video" in the example) (3).

Click to expand

Once you click in the icon of the specific plugin (4, in the image above), a new popup box replaces the previous one, showing the specific parameters for that plugin, and you can optionally also display the params hidden by default under the "Advanced options" section through clicking at the corresponding button with that name:

Vimeo

Display a Vimeo video

URL   
Entire URL to the Vimeo video. Example: http://vimeo.com/3319966

Width   
Width in pixels

Height   
Height in pixels

Advanced options

Quality   
Quality of the video

Full screen   
Expand to full screen

File ID   
Numeric ID of a Vimeo file in a File Gallery (or list separated by commas or []).

Field ID   
Numeric ID of a Tracker Files field, using Vimeo displayMode.

Item ID   
Numeric ID of a Tracker item, using Vimeo displayMode.

Gallery ID   
Gallery ID to upload to.

Close Insert

Click to expand

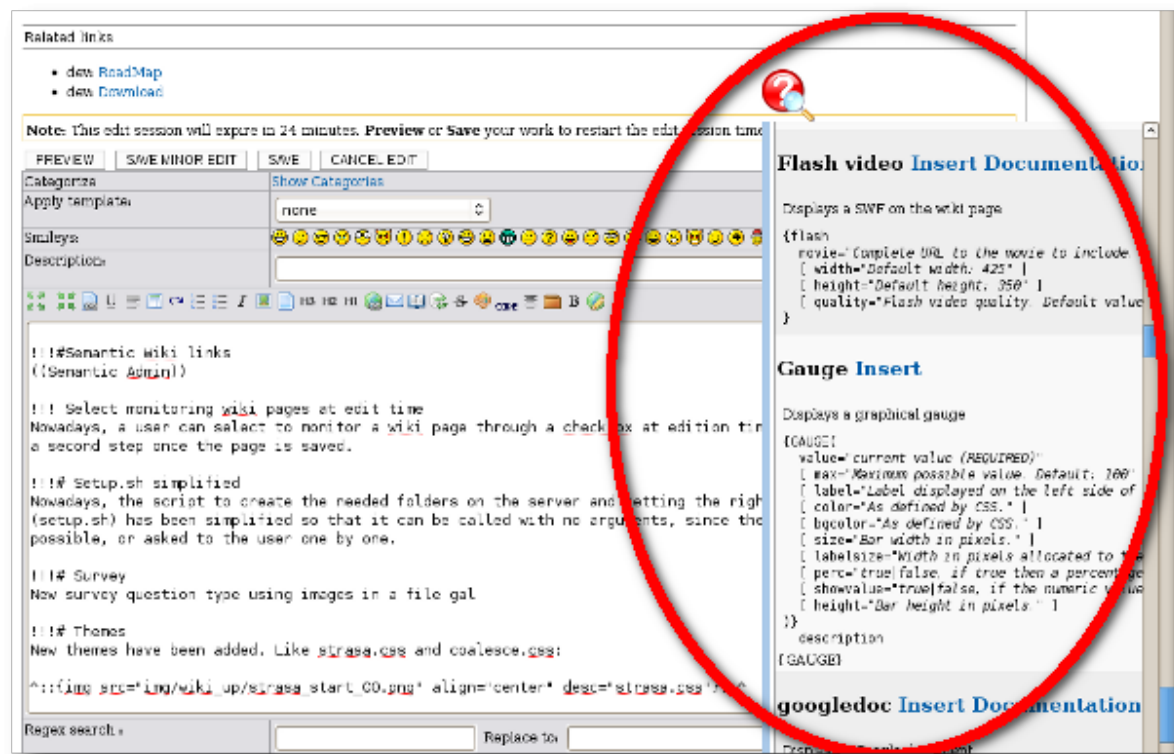

And when you click at insert, the code is inserted in the wiki page:

# Wiki Help revamped

The Wiki Help has been revamped so that it is offered on the side as a red balloon with a lens on top. When you click on it, it allows you to select the Wiki help or Plugin help, once you click on any of the green + signs on their left.

For instance, if you click on the  icon next to Plugin Help, you'll be shown the new edit help, where you can scroll on the side independently of the scroll of the wiki page, and click on the **"Insert"** link next to any plugin title.

Descriptions and possible parameters for plugins are shown in a clearer way.

Later on, once saved, those plugin call can be edited in a quicker and more user friendly way, through the new plugin edit feature:
