# Parameters

Show the full category path for a wiki page

*Introduced in Tiki 1.*

[Go to the source code](#)

*Preferences required: feature\_categories, wikiplugin\_catpath*

## Parameters Accepted Values

divider

top

(blank)

y

n

---

## Description

String used to separate the categories in the path.

Default character is `>`.

Show the top category as part of the path name (not shown by default)

Default	Since
>	1
no	1

# Example

Let's say you had a page with the lyrics to the song *Hands on the Wheel*, and it is categorized by the singer and the composer, and that all pages with song lyrics on the site are categorized as **Songs**. Here's what the CATPATH plugin would produce on that page:

*This code,*

**Example syntax**

```
{catpath}
```

*Would produce:*

```
Songs > Singer > Willie Nelson  
Songs > Composer > Bill Callery
```
