

Plugin Definition List

This wiki plugin creates a definition list based on the terms and definitions given. Each term is shown on one line and its definition is indented on the next. It is the equivalent of using the HTML and related tags.

Parameters

Technically, this plugin doesn't require parameters, but certain elements are required between the tags as shown below. Create a definition list

Introduced in Tiki 1.

Go to the source code

Preferences required: `wikiplugin_dl`

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		One entry per line. Each line is in <code>Term: Definition</code> format.		
<code>type</code>	(blank) s h	Type of definition list (left-aligned or horizontal).		16.0

Examples

Basic syntax

{DL()} term 1 : definition 1 term 2 : definition 2 {DL}

Example with $\hat{\Lambda}$ formatting

This code,

```
[DL()] __Life__ : "a principle or force that is considered to underlie the  
distinctive quality of animate beings" __Love__ : "affection based on admiration,  
benevolence, or common interests" __Bagel__ : "a firm doughnut-shaped roll  
traditionally made by boiling and then baking" {DL}
```

Would produce:

Life

*a principle or force that is considered to underlie the
distinctive quality of animate beings*

Love

*affection based on admiration, benevolence, or common
interests*

Bagel

*a firm doughnut-shaped roll traditionally made by boiling and
then baking*
