

# PluginTikiManagerClone

This is a Wiki Plugin which embeds a button in a wiki page to perform a pre-configured clone or clone and upgrade action of an instance in Tiki Manager

This makes it simple for operations like:

- Clone from production to staging
- Clone from staging to production
- etc.

Like PluginTikiManagerUpdate, it requires the Tiki Manager Package

# Parameters

Make on demand clone of an instance to another

*Introduced in Tiki 25. Required parameters are in **bold**.*

[Go to the source code](#)

*Preferences required:* feature\_tiki\_manager, wikiplugin\_tikimanagerclone

| Parameters          | Accepted Values  | Description   | Default | Since |
|---------------------|------------------|---|---------|-------|
| (body of plugin)    |                  | Button text(The text that will be displayed on the clone instance button).  |         |       |
| <b>branch</b>       | string           | Select branch.  |         | 25.0  |
| <b>source</b>       | string           | Source instance(instance to clone) ID or name.  |         | 25.0  |
| <b>target</b>       | string           | Destination instance(s) ID or name, comma separated in case of multiple instances.  |         | 25.0  |
| timeout             | int              | Modify the default command execution timeout from 3600 seconds to a custom value  | 3600    | 25.0  |
| direct              | 1<br>0           | Prevent using the backup step and rsync source to target.   | 1       | 25.0  |
| ignoreRequirements  | 0<br>1           | Ignore version requirements. Allows to select non-supported branches, useful for testing.   | 0       | 25.0  |
| mode                | clone<br>upgrade | Clone mode(Clone or Upgrade). The Clone mode allows to make a clone only and the Upgrade mode, to make a clone with an extra upgrade operation. | clone   | 25.0  |
| skipCacheWarmup     | 0<br>1           | Skip generating cache step. (Only in upgrade mode).   | 0       | 25.0  |
| skipReindex         | 0<br>1           | Skip rebuilding index step. (Only in upgrade mode).   | 0       | 25.0  |
| stash               | 0<br>1           | Saves your local modifications, and try to apply after update/upgrade   | 1       | 25.0  |
| unifiedIndexRebuild | 1<br>0           | Unified index rebuild, set instance maintenance off and after perform index rebuild. (Only in upgrade mode)                                     | 0       | 25.0  |
