

# PluginTikiManagerClone

This is a Wiki Plugin which embeds a button in a wiki page to perform a pre-configured clone or clone and upgrade action of an instance in Tiki Manager

This makes it simple for operations like:

- Clone from production to staging
- Clone from staging to production
- etc.

Like PluginTikiManagerUpdate, it requires the Tiki Manager Package

## Parameters

Make on demand clone of an instance to another

*Introduced in Tiki 25. Required parameters are in **bold**.*

[Go to the source code](#)

*Preferences required:* feature\_tiki\_manager, wikiplugin\_tikimanagerclone

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		Button text(The text that will be displayed on the clone instance button).		
<b>branch</b>	string	Select branch.		25.0
