

Plugin Versions

Use this Wiki Plugin to divide a wiki page into separate "versions." Tiki will display a navigation box that allows users to display each version of the page. For example, you can use this plugin to separate a single wiki page into Release 1, Release 2, and Release 3 information.

Parameters

Create tabs for showing alternate versions of content

Introduced in Tiki 1.

[Go to the source code](#)

Preferences required: `wikiplugin_versions`

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		Block of text separated by <code>-(version x)-</code> markers. Text before the first marker is used by default.		
<code>default</code>		Specifies version label to show when displaying the page for the first time. Default label is 'Default'	Default	1
<code>nav</code>	(blank) y n	Display a navigation box that allows users to select a specific version to display.	n	1
<code>title</code>	(blank) y n	Display the current version name as the title. No title shows when <code>nav="y"</code> ; otherwise shows by default.	y	1

Notes

- If you use Wiki Config wiki page caching, this plugin may not render properly.
- The "versions" used for this plugin are different than the "versions" stored in the wiki page history.

Examples

o separate different versions of text use: 3 dashes (hyphens), followed by the version label in parenthesis, followed by
at least 3 other dashes or hyphens. For example:

---(version 3)-----

Basic example

This code:

```
{VERSIONS(nav="y" title="y")}
  This is the default text
---(version 3)-----
  This is version 3 info
---(version 2)-----
  This is version 2 info
---(version 1)-----
  This is version 1 info
  {VERSIONS}
```

Would produce:

This is the default text

More Examples

This code:

```
{VERSIONS(nav="n")} This is the default text ---(version 3)----- This is version 3 info ---(version 2)---  
----- This is version 2 info ---(version 1)----- This is version 1 info {VERSIONS}
```

Would produce:

Default

This is the default text

Sample usage in conjunction with PluginTracker and PluginTrackerList (these are Screenshots):

The screenshot shows a web page for 'Inscripcions 2007'. At the top, there is a navigation bar with the text 'Pre-inscripcions als cursos de l'any 2007' and a language dropdown menu set to 'Català'. Below this, there is a yellow button labeled 'Formulari' and a link 'Mostra les pre-inscripcions ja realitzades'. The main content area is titled 'Cursos i horaris disponibles - 2007' and contains a list of courses for 2007. The first course is 'Curs (01) - Linux per a persones usuàries de Windows' with a sub-description 'Introd. a partir de Linkat (o Ubuntu)'. The second course is 'Curs (02) - Introducció als Sistemes operatius GNU/Linux' with a sub-description 'Horari de 18h a 21h'.
