

PluginXMPP

New in [Tiki19](#) is a way to embed an [XMPP](#) chatroom in a wiki page, powered by [ConverseJS](#). See also [Module XMPP](#)

```
{xmpp room="general" view_mode="embedded"}
```

chatbox will appear in the middle of the page. This chatbox is a group chat, where many users can send messages. You can create a room for each discussion topic.

PARAMETERS

Chat using Xmpp

*Introduced in Tiki 19. Required parameters are in **bold**.*
