

# Shadow Layer tab

## Overview

Use this tab to select your Tiki theme and options, and other template configurations.

## To Access

From the [Look and Feel Admin](#) page, click the **General Layout Options** tab.

## Note

You must have your 'site layout' set to classic in order to see this tab. These options are for legacy support only.

The screenshot shows the 'Look & Feel' admin interface with the 'Shadow layer' tab selected. The interface includes a navigation bar with tabs for 'Theme', 'General Layout', 'Shadow layer', 'Pagination', 'UI Effects', and 'Customization'. Below the navigation bar, there is a 'Miscellaneous' section and a 'Shadow layer' section. The 'Shadow layer' section has a checked checkbox labeled 'Shadow layer' and a description: 'Additional layers for shadows, rounded corners or other decorative styling'. Below this, there are ten rows of color pickers, each with a label on the left and a pink color bar on the right. The labels are: 'Main shadow start', 'Main shadow end', 'Header shadow start', 'Header shadow end', 'Middle shadow start', 'Middle shadow end', 'Center shadow start', 'Center shadow end', 'Footer shadow start', 'Footer shadow end', 'Module (box) shadow start', and 'Module (box) shadow end'. An 'Apply' button is located at the bottom right of the form.

Shadow Layer tab

# Option

Shadow layer

Main shadow start

Main shadow end

## Description

This is a legacy but useful option that activates extra divs in the site layout template file that can be used for styling purposes. Not all site layout templates (selected under the "Theme" tab) support this feature.

The tag `<div id="main-shadow">` and the contents of this textarea are placed just below the top of the HTML body

The closing tag of `id="main-shadow"` and the content of this textarea are placed just before the body closing tag.

# Option

Header shadow start

Header shadow end

Middle shadow start

## Description

The tag `<div id="header-shadow">` and the contents of this textarea are placed just before the page-header divs.

The closing tag of `id="header-shadow"` and the contents of this textarea are placed just after the page-header divs.

The tag `<div id="middle-shadow">` and the contents of this textarea are placed just before the middle of the page divs.

# Option

Middle shadow end

Center shadow start

Center shadow end

## Description

The closing tag of `id="middle-shadow"` and the contents of this textarea are placed just after the middle of the page divs.

The tag `<div id="center-shadow">` and the contents of this textarea are placed just before the center-column div.

The closing tag of `id="center-shadow"` and the contents of this textarea are placed just after the center-column div.

# Option

Footer shadow start

Footer shadow end

Module (box) shadow start

Module (box) shadow end

---

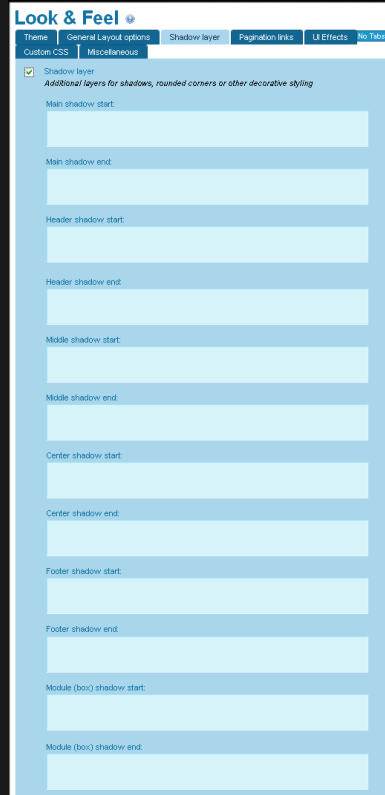

## Description

The tag `<div id="footer-shadow">` and the contents of this textarea are placed just before the page footer div.

The closing tag of `id="footer-shadow"` and the contents of this textarea are placed just after the page-footer div.

The tag `<div class="box-shadow">` and the contents of this textarea are placed just before each module div (a module in Tiki parlance is a container like a Bootstrap panel).

The closing tag of `class="box-shadow"` and the contents of this textarea are placed just after each module div.
