

# Share

Introduced in Tiki6, this feature allows sending messages to Social Networks, as well as internal messages or forum posts to alert on some wiki page in your Tiki site, etc.

# How to use Share

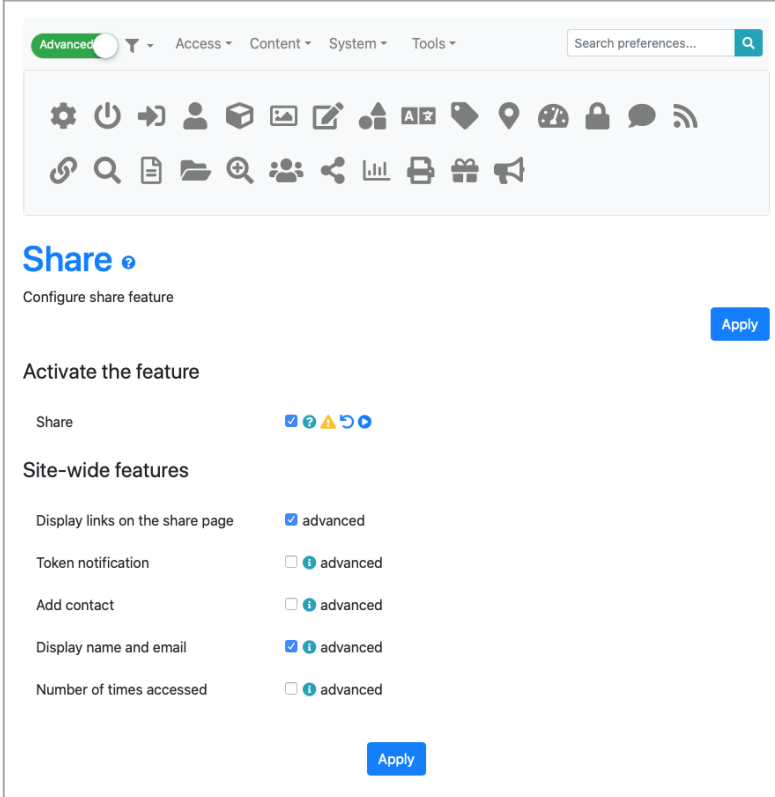

## **Enable the Feature:**

Admin home > Features > Global Features > Additional > Share

# Admin Share

**To access:** Click the **Share** icon  on the Admin Panel  
or access **<http://example.org/tiki-admin.php?page=share>**

Set it up in the Share admin panel:

The screenshot shows the Tiki Admin interface for the 'Share' feature. At the top, there's a navigation bar with tabs: 'Advanced' (selected), 'Access', 'Content', 'System', and 'Tools'. A search bar is on the right. Below the navigation bar is a toolbar with various icons. The main content area is titled 'Share' with a subtitle 'Configure share feature'. There's an 'Apply' button on the right. The 'Activate the feature' section shows the 'Share' feature is enabled with a checkmark and a share icon. The 'Site-wide features' section lists several options: 'Display links on the share page' (checked, advanced), 'Token notification' (unchecked, advanced), 'Add contact' (unchecked, advanced), 'Display name and email' (checked, advanced), and 'Number of times accessed' (unchecked, advanced). An 'Apply' button is at the bottom.

Apply

Click to expand

Once enabled the feature, all pages will have a new icon on the top right corner, to allow the user to share this page with others:

Click to expand

Once you click there, you will be offered some options to share the page with, depending on the associated features (internal or related to external social networks) which are already enabled and configured in your site.

Click to expand

Share with access rights

This feature is useful when sharing content that is not publicly available. The recipients will inherit user's access rights for the shared resource only.

Preferences required: auth\_token\_access and auth\_token\_share.
