

# Text TrackerÂ Field

This field type creates a simple text field that is not wiki-parsed.

Parameter	value	description	version
<b>next</b>	1 or empty	empty: next field on next row, 1: next field on same row	
<b>size</b>	numeric		
<b>prepend</b>	text	text to be displayed before the field value	
<b>append</b>	text	text to be displayed after the field value	
<b>max</b>	numeric	maximum number of characters that can be saved	
<b>autocomplete</b>	y or n	if y (default n) will propose an autocomplete on the values of the field (if multilingual, will propose only the values in the associated language)	tw>=4.0

Note:

- The text is not wiki parsed and the html is not interpreted (if you want it wiki parsed, use a textarea field)
- if you want to specify the size of the text but not to put the next field on the same line, you have to enter the parameter like

,50

or

0,50
