

Tracker Inline edit

There is a new feature since Tiki11 in Trackers to allow Inline editing of items (using `ajax_inline_edit`), from the list of displayed items.

You can enable it at **Admin home > Trackers > Configuration (tab) > Inline editing > Tracker list inline editing**

Once enabled, you can

- edit items from the tracker items list (using the tracker feature itself)
- use some new params in `PluginTrackerList` and `PluginTrackerFilter`, to allow some displayed fields to be editable.

Param "**editable**", with the list of fields to be editable, or the whole list of displayed items, with param "**editableall=y**"

You will see this icon  next to each value that can be edited inline.

Click to expand

A similar behavior happens with the results from PluginTrackerList or PluginTrackerFilter :

Click to expand

See PluginTrackerList or PluginTrackerFilter for more information.
