

# Steps

**Step 1:** First enable the "Allow users to use 2FA" option in the "Log In" feature in your Tiki, go to **Settings** at **Control Panels** at **Log In** at **General Preferences** tab (`tiki-admin.php?page=login#contentadmin_login-1`) (e.g. `http://www.example.com/tiki-admin.php?page=login#contentadmin_login-1`) with "Preference Filters" to Advanced

**Step 2:** Next, install Google Authenticator® App on your mobile phone. See how to install it here.

**Step 3:** Check the "Enable two-factor authentication" option in the "User Preferences" page, the "Account Information" tab and click on "Save changes" button. Note that the current password is required to make changes.

At this step, you need to connect Tiki and the Google Authenticator® application by scanning the QR Code generated in the "User Preferences" page. Click on "Show QRCode" to display the QR Code, scan it using the application you installed in step 2.

Enable two-factor authentication:  

[Hide QRCode](#)

1. Install Google Authenticator® app on your device and open it.
2. Tap "Scan a barcode".
3. Scan the QR code that is open in your browser.
4. Done, Google Authenticator® is now generation codes.

**Step 4:** Finally, when authenticating on page "Log In" (e.g. [http://www.example.com/tiki-login\\_scr.php?twoFactorForm](http://www.example.com/tiki-login_scr.php?twoFactorForm)), take the code generated by Google Authenticator® App and enter it in the field "Two-factor Authenticator Code".

The image shows a login form titled "Log In". It contains three input fields: "Username:" with a cursor, "Password:", and "Two-factor Authenticator Code:". Below the password field is a blue link "I forgot my password". At the bottom, there is a blue "Log in" button and a blue "Register" link.
