```

Shows an icon with the number of and a link to user notifications

[Go to the source code](#)

Preferences required: monitor_enabled

Parameters

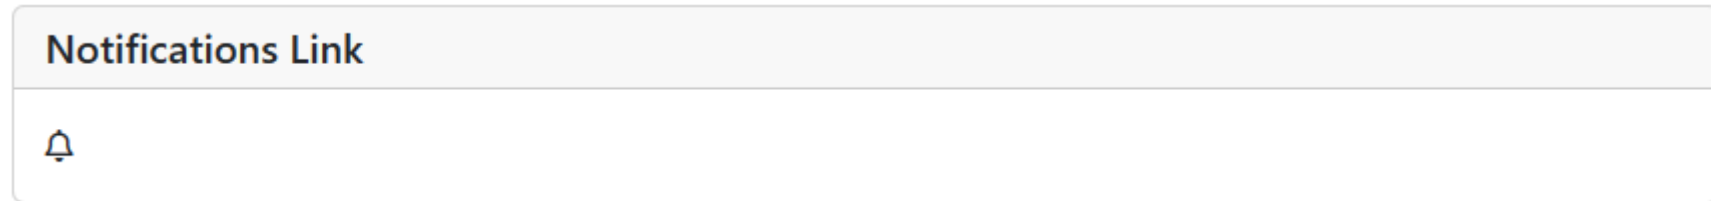

no parameters

Example

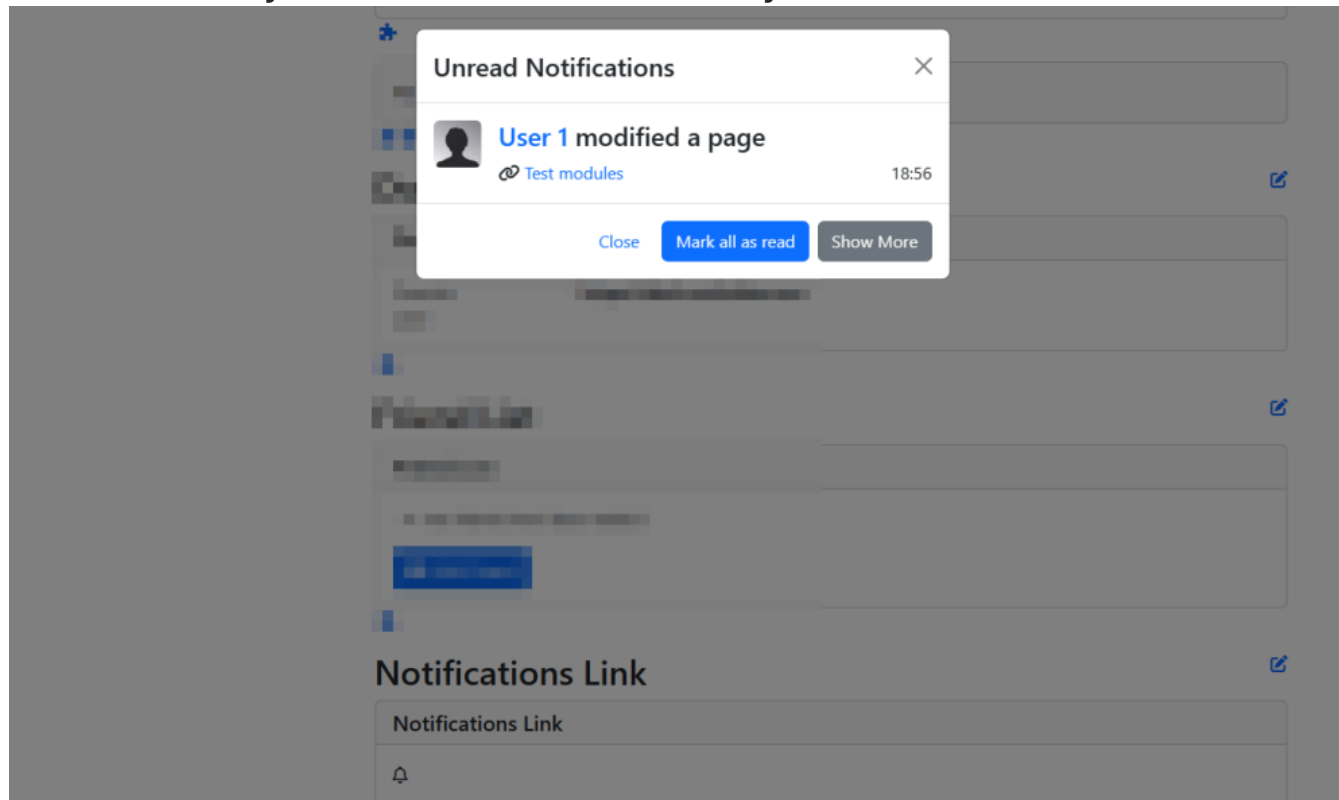

In the example below we pass in a wiki page the module Top Blog Posters through the plugin module.
So, this code:

```
{module module="notificationlink"}
```

Would produces on this site:

Then if you click on the bell icon, you will see notifications:

Note: To ensure the module functions as expected on a page, navigate to its **Page Actions** section and configure the settings according to your preferences..
