

- You also need to define which TUC types are allowed in the tiki site, through "**Admin home > Payments > Tiki User Credits**" (tiki-admin.php?page=payment):

The screenshot shows the configuration page for Tiki User Credits. At the top, it displays the current payment system as 'Tiki User Credits' with a dropdown arrow and an information icon. Below this, it notes 'PayPal: see PayPal.com - Cclite: Community currency' and 'Requires Payment (OK)'. The currency is set to '€' with an information icon. The default acceptable payment delay is '30' days. There is a field for a 'Wiki page containing the instruction to send manual payment like check:' with an information icon and 'Requires Payment (OK)'. Below these are tabs for 'PayPal', 'Cclite', and 'Tiki User Credits'. Under the 'Tiki User Credits' tab, there are two sections: 'Types of credit to use:' with a dropdown menu showing 'TUC-Hour' and 'Requires Payment (OK) / Requires Tiki User Credits (OK)', and 'Exchange rate for types of credit to use:' with a text input field containing '0.02' and 'Requires Payment (OK) / Requires Tiki User Credits (OK)'.

- Credits are used in the order of the earliest expiration date. Credits with no expiration date are used last.

Some definitions (useful for the admin panel):

Add credits to users

You add credits to users through `tiki-admin_credits.php?userfilter=username` (being username the name of the user; which you can type in the username search bo

Manage Credits

Username:

Type	Creation Date (YYYY-MM-DD HH:MM:SS)	Expiration Date (YYYY-MM-DD HH:MM:SS)	Used (level credits always 0)	Total
<input type="checkbox"/> TUC-Hour	<input type="text" value="2010-09-24 10:00:00"/>	<input type="text" value="2010-09-25 23:55:00"/>	<input type="text" value="0"/>	<input type="text" value="20"/>
<input type="checkbox"/> TUC-Hour	<input type="text" value="2010-10-01 10:00:00"/>	<input type="text" value="2010-10-02 23:55:00"/>	<input type="text" value="0"/>	<input type="text" value="20"/>
New <input type="text" value="TUC-Hour"/>	<input type="text"/>	<input type="text"/>	<input type="text" value="0"/>	<input type="text"/>

User Credits Expiry Summary (Plans)

User Plan	Start of Latest Plan	Start of Next Plan	Expiry
TUC-Hour	2010-09-24 10:00:00	2010-10-01 10:00:00	2010-10-02 23:55:00

An admin can also set that a user has already consumed some of that set of allocated credits:

Use User Credits

Use:

Amount:

And a report on the historical usage can be shown also:

Historical Usage Report

Type	Usage Date	Amount Used
TUC-Hour	25-09-2010 15:31:26	5

Use Credits

You can pay invoices of Tiki [Payments](#) using [Tiki User Credits](#).

The credits that a user has left can be seen at any time by means of the module [Module credits](#):

Tiki User Credits

Hour/s:  5/20 h

Developer Tips

You could make use of functions in [lib/credits/creditlib](#):

function `useCredits` to use up credits and function `addCredits` to add credits for users. Also use `getCredits` to get a user's credit information, and `getScaledCredits` which extends `getCredits` with more human readable information.
