Blogs Config

Admin Access

To access administration, go to **Home Page** and, on the **Menu**, click on **"Admin (click!)"**.

Sections: Tiki Admin Panel

You will access the **Sections** Tiki Config Panel , as shown in this graphics:

Blog settings

Blogs

..

From the Tiki Config Panel, click the Blogs icon to display its settings panel, the top of which appears like so:

Home Blog (main blog)

The Home Blog will have the following properties:

- If not selected it will default to the first blog created.
- It's where you go if you click on blogs in the main menu (without expanding the menu).
- It's where you go as the home page if you select the home page to be a blog (in the general settings).

Blog features

Enable/disable rankings/comments and you can select which is the Home Blog.

Blog listings configuration

Blog comments settings

Blog Archives

You can see the blog archives using the module **months_links**, which will also allow you to see links for other years posts.

Archives	Archives	Архивы
July 2010 (1)	Juillet 2010 (1)	Июль 2010 (1)
June 2010 (4)	Juin 2010 (4)	Июнь 2010 (5)
May 2010 (3)	Mai 2010 (3)	Апрель 2010 (1)
April 2010 (2)	Avril 2010 (2)	
Module shown when **English** is selected as language	Module shown when **French** is selected as language	Module shown when **Russian** is selected as language
Note that the number of blog posts per year can vary depending on the language		

In order to have this module configured, you have to add some paramters as in the screenshot below:

				Right Modules		
Name	**Order**	**Cache**	**Rows**	**Parameters**	**Groups**	**Action**
last_blog_posts	2	0	10	title=Latest+Comments&nonums=y	Anonymous	🖊🔽⬅❌
months_links	31	0	10	feature=blogs&id=1&lang=en&title=Archives	Anonymous	🖊🔼🔽⬅❌
months_links	32	0	10	feature=blogs&id=2&lang=fr&title=Archives	Anonymous	🖊🔼🔽⬅❌
months_links	33	0	10	feature=blogs&id=3&lang=ru&title=Архивы	Anonymous	🖊🔼⬅❌

So this way, each language can have a module specific for that language, showing the posts of that blog (one blog per language), for a given time frame, specified in the parameters of the module definition.

In addition, you can show blog posts between two dates in a wiki page using the Blog list plugin, with the parameters for start date and end date.
