Since Tiki 16 Tiki integrate default parameters that are used by Facebook when fetching a page if they are missing or if you prefer to use your own for the entiere Tiki.

Activate Facebook integration

Note: It is possible to have your post (forum, blog, article, etc) posted to Twitter using an external social media automation solution. Those external services are very popular and use Tiki RSS feed to fetch and publish content on your behalf.

Consumer Key and **Consumer Secret** are used for integrate your Tiki and Facebook using a Facebook application.

Setting up Facebook integration

First, you need to register a new application with Facebook. This can be done via the [Developers tool](#). Later on, you can edit the Application via [Application settings](#) in your Facebook profile.

Step 0

On the Developer page click on [Set Up New Application](#) and enter a name for your Application, sell your soul (agree to the terms) and click on **Create Application**. After a successful captcha check, you can proceed with step 1.

You may need to login in Facebook to accept the validation process in Facebook (to allow the developer application use your account details in Facebook, etc).

Step 1

The name of your application is already set, so you don't need to enter a new one. Feel free to upload a logo and icon for your app. As I give support via e-Mail, I entered my email address for the users support.

Step 2

Enter the site URL and the Site Domain. My test server is at test.ott-consult.de and tiki is at the URL for my test server is at <http://test.ott-consult.de/trunk>. The Site URL therefore is http://test.ott-consult.de/trunk/tiki-socialnetworks.php?request_facebook.

[Edit octestserver](#) [Back to My Applications](#)

About

Mobile and Devices

Advanced

Core Settings

| | | |
|--------------------|---|--|
| Application ID | 1 8 | Your OAuth client_id |
| Application Secret | 7 4 | Your OAuth client_secret |
| Site URL | ott-consult.de/trunk/tiki-socialnetworks.php?request_facebook | Your site's URL |
| Site Domain | test.ott-consult.de | If set, Facebook will enable authentication on all subdomains (e.g., "example.com" will enable ".example.com") |

Save Changes

Step 3

In this step, you don't to change anything since the **Post-Authorize Callback URL** field has been removed by Facebook.

[Edit octestserver](#) [Back to My Applications](#)

Apple iOS

iTunes App Store ID:

Facebook uses this ID to link your app in the iTunes App Store (e.g., 284882215). [Read More](#).

Save Changes

Step 5

Start Using Facebook Credits, this financial/billing integration mostly not needed for Tikiwiki, leave it that way.

About

Web Site

Facebook Integration

Mobile and Devices

Credits

Advanced

Start Using Facebook Credits

Welcome to the [Facebook Credits](#) program. To get started:

1. Register your company below
2. Provide core settings below
3. Review [API documentation](#) and complete your integration

Company Information

Company Name: [Don't see your company listed? Register it now](#)

Before accepting Facebook Credits, we need to collect company information to pay you for Credits users spend in your application.

Core Settings

Credits Callback URL:

Email:

Credits Test Users (optional):

Facebook pings this URL after a user initiates or updates an order.

This email is used for payments related communication.

Users entered here (UIDs, comma-delimited) will be able to use your app and go through Facebook Credits flows but will not be charged.

Save Changes

Step 6

On this last step, you can give the Facebook **Deauthorize Callback** which will be called, when a user disallows your application on Facebook. Don't choose sandbox mode here.

Usually, your web server has a static IP address. By putting it on the **server whitelist**, you can add a bit of security, as only requests from that IP will be processed. If you run a server farm with multiple servers, add all IP addresses.

You can also uncheck all the "deprecated" setting, it won't hurt.

About

Web Site

Facebook Integration

Mobile and Devices

Credits

Advanced

Authentication

Deauthorize Callback: Facebook strips the URL when it receives it. You can use %s to insert the domain of your site.

Sandbox Mode: Enabled Disabled

Timeline-less events: Enabled Disabled

JSON Encoding Empty Arrays: Enabled Disabled

Security

Server Whitelist:

If you enter a list of IP addresses, Facebook will check requests from your application against this list before accepting them.

Advertising

Advertising Accounts:

Causes received list of Facebook advertising accounts and their ad sets, and the ads within those ad sets, and when changing the account.

Advanced Canvas Features

Printed FQL: Facebook will send the result of this FQL query to the parameters in your Canvas URL.

Preload FQL Multicopy: Facebook will send the result of this FQL query to the parameters in your Canvas URL.

Daily Fresh: Facebook will attempt to preload page resources.

Save Changes

Now you created the application at Facebook and you can enter the data on your tiki server. Go to Admin->Social networks and enter the data from Facebook.

Facebook Settings

Note

To use Facebook integration, you must register this site as an application at <http://developers.facebook.com/setup/> and allow extended access for the application. Enter <your site URL>tiki-socialnetworks.php as connect URL.

API key: 1 1 ⓘ ⚡

Application secret: 7 4 ⓘ ⚡

Application ID: 1 8 ⓘ ⚡

User authorization

Users need the tiki_p_social_network permission in order to use social networks. To login via facebook, the Anonymous group will need this permission.

Before being able to use the Facebook integration, users must authorize the TikiWiki site by requesting an oauth token. This can be done via the **Social networks** tab on [My Tiki](#).

Note : As i (Bernard) authorize it i encounter an error from Facebook servers: "message": "Invalid redirect_uri: Given URL is not allowed by the Application configuration.". I had to logout/login for Facebook to accept the authorization. It is possible also that you have to wait more than 15mn for the Facebook server to use the setting you just entered.
