

Google Maps Admin

Google Maps icon

[Google Map](#) feature can be enabled through "**Admin home > Features > Google Map**".

It can be initially set up for the whole Tiki through "**Admin home > Google Maps**" ([tiki-admin.php?page=gmap](#)).

First time, it will recognize that you don't have any Google Map key for your specific web site domain (required), and it will suggest you to request one at:

<http://www.google.com/apis/maps/signup.html>

Once you complete the process in the Google site side, you can come copy the generated key to the corresponding field in **tiki-admin.php?page=gmap**. Once done, you will be able to see your map below, like this:

http://www.google.com/apis/maps/signup.html'. Below this is a text input field for the 'Google Map Key:' containing a long alphanumeric string. There are three more input fields: 'Default x for map center:' with the value '1.0900497436523438', 'Default y from map center:' with the value '41.52682878717628', and 'Default zoom level:' with a dropdown menu set to '12'. A 'Save' button is located at the bottom of the form. Below the form is a map of the Sant Martí de Riucorb area, showing streets and landmarks like Maldà, Rocafort de Valldona, Nalec, and Ciutadilla. The map has navigation controls on the left and style selection buttons ('Mapa', 'Satèl·lit', 'Híbrid') at the top right."/>

Administration: Google Maps

Google Maps

Google Map setup

You need to request a Google Maps Key for this web site. You can easily generate a key for your domain at : <http://www.google.com/apis/maps/signup.html>

Google Map Key:

Default x for map center:

Default y from map center:
