

Improve Tracker Forms

You can improve tracker forms enabling an experimental jquery user interface library called "**Chosen**"

Enable the feature

You can enable the feature in:

Admin home > Features > Interface (tab) > jQuery plugins and add-ons > Experimental > jQuery-ui Chosen Menu

The screenshot shows the 'Interface' tab of the Admin Panel. Under the 'jQuery plugins and add-ons' section, the 'jQuery UI Theme' is set to 'flick'. In the 'Experimental' section, the 'jQuery-ui Chosen Menu' checkbox is checked and highlighted with a red box. Other experimental options include 'jQuery Infinite Carousel' (unchecked), 'jQuery Sortable Tables' (checked), and 'jQuery-ui Select Menu' (unchecked). The 'Mobile' section shows 'Mobile Access' is unchecked with a warning icon and the text 'You need to set Perspectives'. An 'Apply' button is located at the bottom of the form.

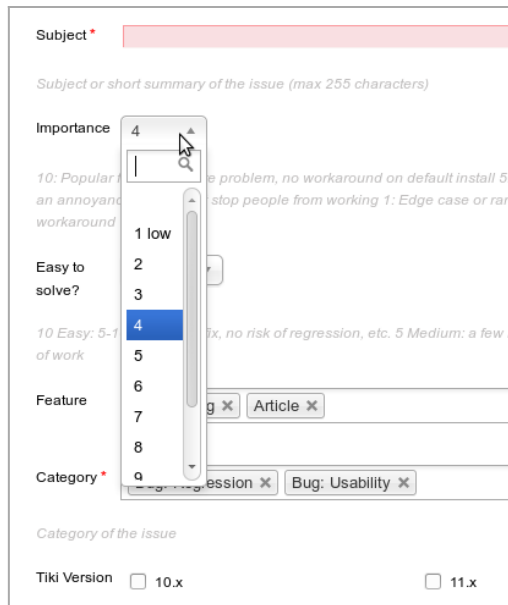

Remember that you need to have your "Preference Filters" in the admin panel with the "Advanced" and "Experimental" options enabled in order to see this feature checkbox.

Features

The screenshot shows the 'Preference Filters' section. It contains four checkboxes: 'Basic' (checked), 'Advanced' (checked), 'Experimental' (checked), and 'Unavailable' (unchecked). A 'Set as my default' button is located to the right of the 'Unavailable' checkbox.

Drop downs

You can choose a value from a dropdown box by selecting the items in the list through scrolling down, as usual, or you can nowadays filter the list values based on the text you type at the top.

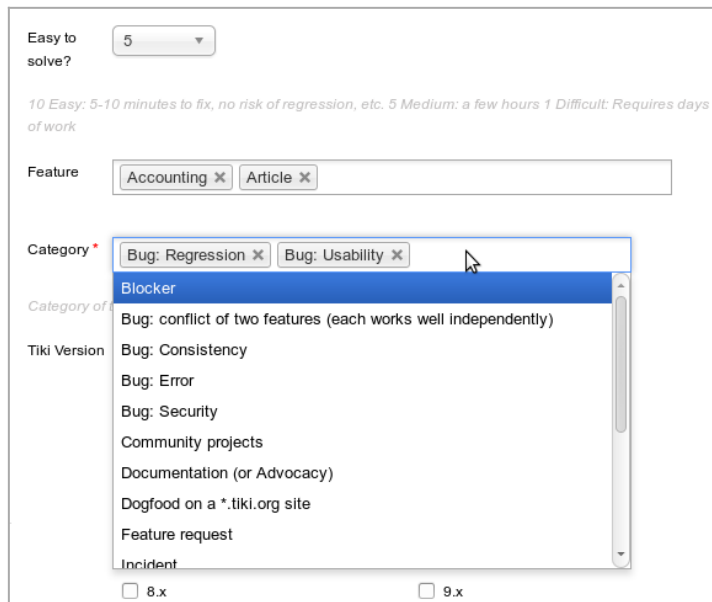

The screenshot shows a form with several fields. The 'Subject' field is at the top, followed by a description: 'Subject or short summary of the issue (max 255 characters)'. Below that is the 'Importance' field, which is a dropdown menu currently expanded to show a list of options from 1 to 9. The 'Easy to solve?' field is another dropdown menu. The 'Feature' field contains two tags: 'g' and 'Article'. The 'Category' field contains two tags: 'Regression' and 'Bug: Usability'. At the bottom, there are checkboxes for 'Tiki Version' 10.x and 11.x.

Click to expand

Multiple selection

Similarly, a section to allow multiple selection of items can be shown in a small but enhanced dropdown box, which allows the user to select one or many of the options, remove them from the list in the text field at the top:

The screenshot shows a form with several fields. The 'Easy to solve?' field is a dropdown menu currently set to 5. Below it is a description: '10 Easy: 5-10 minutes to fix, no risk of regression, etc. 5 Medium: a few hours 1 Difficult: Requires days of work'. The 'Feature' field contains two tags: 'Accounting' and 'Article'. The 'Category' field contains two tags: 'Bug: Regression' and 'Bug: Usability'. Below the 'Category' field is a dropdown menu currently expanded to show a list of options: 'Blocker', 'Bug: conflict of two features (each works well independently)', 'Bug: Consistency', 'Bug: Error', 'Bug: Security', 'Community projects', 'Documentation (or Advocacy)', 'Dogfood on a *.tiki.org site', 'Feature request', and 'Incident'. At the bottom, there are checkboxes for 'Tiki Version' 8.x and 9.x.

Click to expand

Filtering displayed options by typed text

Additionally, you can also filter the values displayed in the dropdown so that only those matching your typed text are shown in the list (only the ones starting with "D" in the example below: Documentation and Dogfood a *.tiki.org site).

Easy to solve?

10 Easy: 5-10 minutes to fix, no risk of regression, etc. 5 Medium: a few hours 1 Difficult: Requires days of work

Feature
