

Configuration

This feature can be activated in the Admin -> Features panel.

The actions that can be recorded can be selected in the Admin -> Action Log panel. The actions that can be viewed at report time can be selected also in the Admin -> Action Log panel, for an admin, or in My Tiki -> Action log icon. For instance,

Setting for recording and viewing actions (admin)

Wiki page actions except viewed will always be recorded but c

Some actions are always recorded as they are needed in other functions (the logging/logout time and the wiki page updated) . Some others can be recorded by activating them individually through this panel, plus it can be chosen which ones are needed for each report, regardless that there may be more actions being logged but not chosen to be displayed in the report.

Since [Tiki 15.1](#), creating, modifying or deleting **calendar events** can also be recorded and displayed through the Action log.

Setting for viewing actions (any user)

Action Log

Report **Setting**

Setting

viewed	action	type
<input checked="" type="checkbox"/>	Created	wiki page
<input checked="" type="checkbox"/>	Removed	wiki page
<input checked="" type="checkbox"/>	Removed last version	wiki page
<input checked="" type="checkbox"/>	Removed version	wiki page
<input checked="" type="checkbox"/>	Renamed	wiki page

Etc...

Adding the permission to the group/s of interest

An admin has to grant a group of users the permission to see action logs, as it should be done for any other permission (see [Permissions](#)). This permission is called **tiki_p_view_actionlog**.

Choose if user's activity log has to be public or private

Another setting related to contributions is at Admin -> Login ("**Displays user's contribution in the user information page:**"). If enabled, a user will be able to see other user's activity log, including his/her contributions on the report. If not, only each owns logs will be reported, except for admin, which will be able to see the log reports of all users, groups, etc.

Report and Statistics

An admin can obtain a report and some statistics on a user/s, group/s and category basis. Any user can obtain a report and some statistics about his/her activity on a category basis.

In the Admin -> Action Log panel for an admin, or in My Tiki -> Action log for any user, the settings and filters can be selected.

Week Day

Reporting filters for any user, through My Tiki - Action log (when contribution feature is enabled)

Note that when [contribution](#) feature is **NOT** enabled, the "**Graph**" button is not shown.

Two actions have special meanings. The category action will record at the same time the action on a object is done the current category(ies) the object has. And the logging action that is only a switch to display or not the login statistics.

Notice: if you change the configuration, the previous actions will not be changed. A new selected action (except for those that are always saved) will not show this type of action that have occurred in the past. If you take away an action, the recording and/or display will be updated accordingly from then onwards.

Report list of actions

Individual actions are listed:

List – Group: a_sima0506

If feature "[Contribution](#)" is enabled, a new column called "Contributions" is added to the list of actions reported, or exported.

Additions are shown in green background, deletions in pink, and the difference is shown without any special background color. Units are either bytes or kb, specified previously through the reporting filters described above, as well as start and end date, and if columns are days or weeks.

Moreover, contributions can be displayed as graphs (several graphs are produced), and they can be also saved in an image gallery for later re-use in reports through wiki pages, etc.

Category:
