

Quick Edit Module

This [Module](#) allows users (with [permissions](#)), to create or edit wiki pages. Simply type the name of a wiki page and click **Edit**.

- If the page exists, Tiki will open the Edit screen for the page.
- If the page does not exist, Tiki will create the page.

Note: The name of the wiki page must conform to the character link format, as defined on the [Wiki Link Formatting field](#).

Usage

You will see it listed at "Admin > Modules > Assign new module > Module Name (drop down)" (**tiki-admin_modules.php**).

You can assign a this [Module](#) to a lateral column (See [Module Admin](#) page if needed), or you can include it within a wiki page, using the [PluginModule](#).

```
{MODULE(module=quick_edit) /}
```

The assigned module (with its default values) looks like this:

Quick Edit a Wiki Page

Parameters

Enables to quickly create or edit Wiki pages. Deprecated - use the Search module instead.

[Go to the source code](#)

Preferences required: feature_wiki

Parameters	Accepted Values	Description	Default	Since
<code>headerwiki</code>		Wiki page to be used as a template to show content on top of edit page		
<code>action</code>		If set, send the form to the given location (relative to Tiki's root) for processing. Default: tiki-editpage.php		
<code>mod_quickedit_heading</code>		Optional heading to display at the top of the module's content.		
<code>submit</code>		The label on the button to submit the form. Default: Create/Edit		
<code>templateId</code>		If set to a template identifier, the specified template is used for creating new Wiki pages. Not set by default.		
<code>customTip</code>		Custom text to be shown as a tip at the top of the edit page		
<code>customTipTitle</code>		Custom title to be shown for the tip at the top of the edit page		
<code>addcategId</code>		If set, pages created through the module have this category prechecked to be categorized in. Not set by default.		
<code>size</code>	int	Size attribute (horizontal, in characters) of the text input field for page names. Default: 15		

To find the ~templateID~ for a particular template, do:

- Admin menu (usually on the left) > Content Templates
- Locate the template you want, and click on the pen icon in that row (in Action column)
- Look at the url, and find the ~templateID=nn~ part. This gives you the ID.

The module can be used to create an auto-complete page search by setting action to *tiki-index_raw.php*.
