

# Module Share

"Display links to different Social Network function (like, tweet, share) linked to the user Social Network registered account or the App set for the site."

## Usage

You can add the module using the Admin Module menu, inserting it in a template or inside the code of Wiki page. The module can be use right away without activating the "old" Share feature in Admin -> Feature.

### Module

```
{MODULE(module=value, parameter=value)}{MODULE}
```

## Parameters

Links for sharing, reporting etc.

[Go to the source code](#)
