Navigation Bar

You can use several ways to create navigation bars in your tiki site.

One easy way to explore some of the possibilities is to apply the profile
https://profiles.tiki.org/Hide+Fixed+Top+Nav+Bar+on+Scroll

Changes by this profile

Site layout (in **Control Panels > Look and Feel**) will be set to `Fixed top navbar 1 (uses "top" module zone)`

Preference Site logo (feature_sitelogo) will be disabled so that logos and site title are not shown twice

After scrolling down a bit, the fixed top bar will disappear and the topbar zone (if any) will become sticky. This is made through the addition of a module with some javascript.

This profile is best demonstrated after applying the `Collaborative Community` profile which include site title and topbar module with menus.
