

Plugin Draw

New in *Tiki8* (and backported to 7.1).

Embed a drawing in a wiki page. See [Draw](#) for more information.

Parameters

Embed a drawing in a page

Introduced in Tiki 7.1.

[Go to the source code](#)

Preferences required: feature_draw, wikiplugin_draw

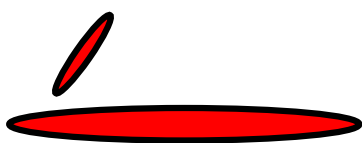

Parameters	Accepted Values	Description	Default	Since
<code>archive</code>	(blank) y n	The latest revision of file is automatically shown, by setting archive to Yes (<code>y</code>), it bypasses this check and shows the archive rather than the latest revision	n	8.0
<code>height</code>		Height in pixels or percentage. Default value is complete drawing height.	Image height	7.1
<code>width</code>		Width in pixels or percentage. Default value is page width, for example, <code>200px</code> or <code>100%</code>	Image width	7.1
<code>id</code>		Internal ID of the file ID		7.1

Example

This code:

```
{draw id="910"}
```

Would produce:
