

Plugin Invite

Introduced in Tiki4

Use this [wiki plugin](#) to invite an already existing user or a new user to one or more of the requesting user's groups.

The groups will be limited to the groups the user is in. A user with his email as his login will be created if the user does not exist. Otherwise if a user with this email will be used. An email will be sent to this user with a link to activate his account for a new user (activation like the email 'refresher') - A simple email will be sent if the user already exists.

Prerequisites and limitations

The user must have the perm `tiki_p_invite` to use this plugin.

In intertiki, the user is locally created.

Parameters

Invite a user to join your groups

Introduced in Tiki 4.

[Go to the source code](#)

Preferences required: `wikiplugin_invite`, `feature_invite`

Parameters	Accepted Values	Description	Default	Since
