[Go to the source code](#)

*Preferences required:* wikiplugin\_quote

| Parameters       | Accepted Values | Description                                                                    | Default | Since |
|------------------|-----------------|--------------------------------------------------------------------------------|---------|-------|
| (body of plugin) |                 | Quoted text                                                                    |         |       |
| date             | date            | Date when the statement quoted was made (YYYY-MM-DD)                           |         | 16    |
| replyto          | text            | Name of the quoted person.                                                     |         | 1     |
| source_url       | text            | The URL to the source quoted.                                                  |         | 16    |
| thread_id        | text            | The thread Id of the comment being replied to in forums.<br>Overwrites replyto |         | 15    |

## Examples

*This code:*

```
{QUOTE(replyto="admin")}Don't quote me on that{QUOTE} {QUOTE()}Anonymous quote{QUOTE}
```

*Would produce on this page:*

*admin wrote:*

*Don't quote me on that*

**“**

*Anonymous quote*
