

# Plugin Report

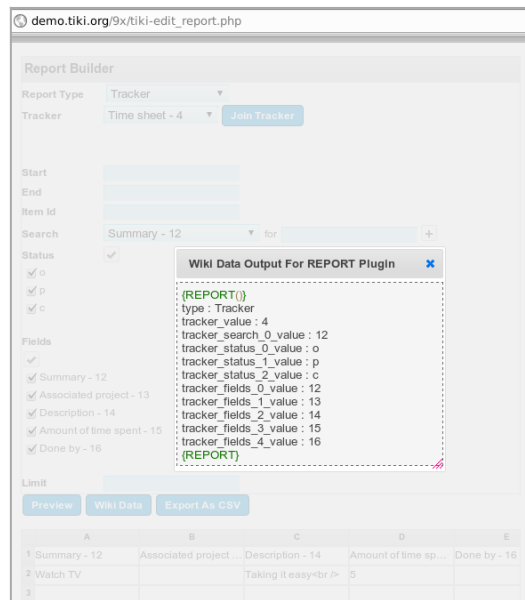

Introduced in [Tiki9](#), use this [wiki plugin](#) to build a [Report](#), store it in a wiki page, and edit it from the page itself.

## Parameters

Tiki Doc From Code error: reportplugin not found

## Examples

Example of code to use for a report, generated from the edit report interface:

The screenshot shows the 'Report Builder' interface in a browser window titled 'demo.tiki.org/9x/tiki-edit\_report.php'. The interface includes a 'Report Type' dropdown set to 'Tracker', a 'Tracker' dropdown set to 'Time sheet - 4', and a 'Join Tracker' button. Below these are fields for 'Start', 'End', and 'Item Id'. A 'Search' field contains 'Summary - 12'. A 'Status' section has a checked checkbox and a 'Wiki Data Output For REPORT Plugin' window open, displaying the following code:

```
;(REPORT);  
;type : Tracker  
;tracker_value : 4  
;tracker_search_0_value : 12  
;tracker_status_0_value : o  
;tracker_status_1_value : p  
;tracker_status_2_value : c  
;tracker_fields_0_value : 12  
;tracker_fields_1_value : 13  
;tracker_fields_2_value : 14  
;tracker_fields_3_value : 15  
;tracker_fields_4_value : 16  
;(REPORT)
```

At the bottom, there are 'Preview', 'Wiki Data', and 'Export As CSV' buttons. Below the buttons is a table with columns A, B, C, D, and E:

	A	B	C	D	E
1	Summary - 12	Associated project ...	Description - 14	Amount of time sp...	Done by - 16
2	Watch TV		Taking it easy 	5	
3
