PluginTabs

Introduced in [Tiki4](#)

Use this [wiki plugin](#) to arrange content into tabs.

Parameters

Tiki Doc From Code error: tabs not found

Example

This code:

    {TABS(name="user_tabset_01" tabs="Title 1|Title 2|Title3")}This is the content of the first tab ///// This is the content of the second tab ///// This is the content of the third tab {TABS}

Would produce:

This is the content of the first tab

This is the content of the second tab

This is the content of the third tab

When clicking on a tab name, the content of each tab is loaded and shown without refreshing the browser window.

And when clicking on the "**No Tabs**" option, the display would change into:
