

Show.t.o Tracker Field

This is a [stub](#)

This field is initially for creating show.tiki.org instances in our bug tracker at <https://dev.tiki.org/tracker5>

It can be useful in other scenarios where Tiki instances need to be created on the fly upon user request, for training, or other purposes.

A more generic [field type](#) is [Tiki Manager Tracker Field](#)

Requirements

SSH2 extension for PHP needs to be installed for show.tiki.org feature to work

```
sudo apt-get install libssh2-php
```

or with newer distributions like ubuntu 20.04 it is:

```
sudo apt-get install php-ssh
```

How to set it up

dev.t.o/ -> 2 pages about show. Concept is described.

1. <https://dev.tiki.org/show.tiki.org+Overview>
2. <https://dev.tiki.org/show.tiki.org>

doc/devtools/tim

Tiki Instance Manager

user "control" ("ctrl")

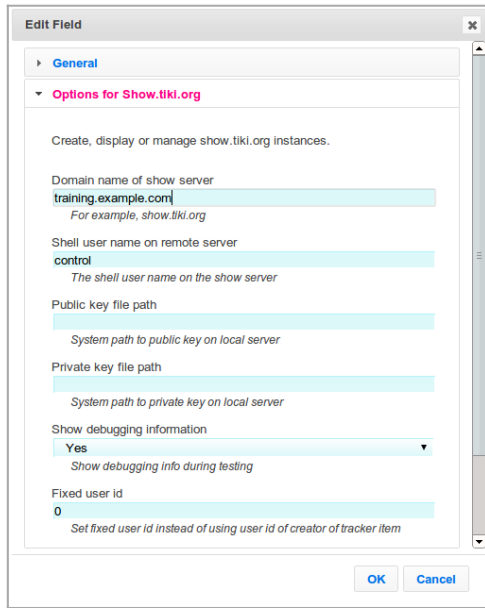

scripts usually located in:

```
/usr/local/sbin/
```

Tracker field type show.t.o:

open that and set it up to use localhost

How to use it

The screenshot shows a dialog box titled "Edit Field" with a close button (X) in the top right corner. The dialog is divided into two sections: "General" and "Options for Show.tiki.org". The "Options for Show.tiki.org" section is expanded and contains the following fields:

- Domain name of show server:** A text input field containing "training.example.com". Below it is a small italicized note: "For example, show.tiki.org".
- Shell user name on remote server:** A text input field containing "control". Below it is a small italicized note: "The shell user name on the show server".
- Public key file path:** A text input field. Below it is a small italicized note: "System path to public key on local server".
- Private key file path:** A text input field. Below it is a small italicized note: "System path to private key on local server".
- Show debugging information:** A dropdown menu with "Yes" selected. Below it is a small italicized note: "Show debugging info during testing".
- Fixed user id:** A text input field containing "0". Below it is a small italicized note: "Set fixed user id instead of using user id of creator of tracker item".

At the bottom of the dialog, there are two buttons: "OK" and "Cancel".
