

# Transactional Email Providers

New in [Tiki24](#)

Leveraging [SmlMail](#), Tiki can send transactional emails (Password reset, notification of a wiki page update, etc.) via services such as:

- [Mailgun](#)
- [Postmark](#)
- [Postage](#)
- [Send Grid](#)
- [Spark Post](#)
- [Amazon SES](#)
- and others...

## Why?

Because sending emails via Tiki (sendmail) or [SMTP](#) can cause issues: Limits on numbers of emails sent, slow delivery, lost emails, mails flagged as spam, etc. Basically because there is so much spam, legitimate projects suffer. The good news is that some services offer free to use entry level services (To promote the service so you upgrade to paid service as your needs grow). The bad news is a loss of data privacy.

## How to use

Configure in the **Mail** section of `tiki-admin.php?page=general`

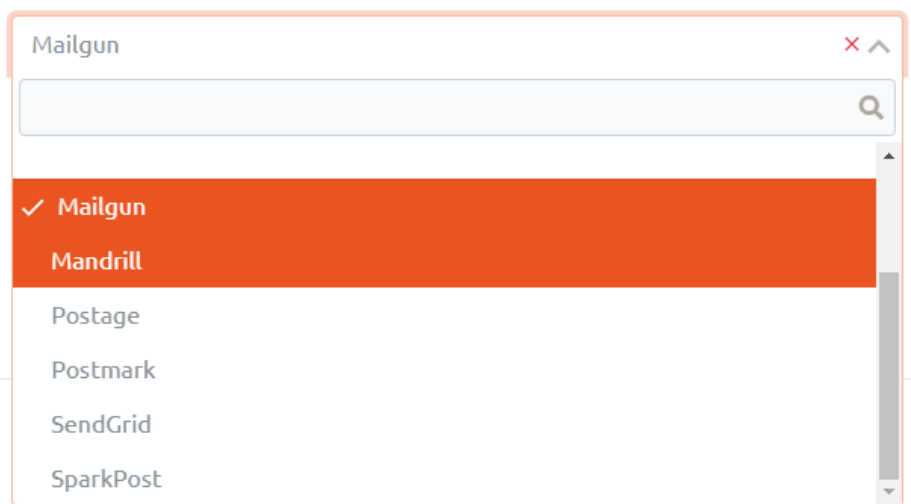

Mail sender

Mailgun Domain

Mailgun Key

Mailgun API Endpoint

SMTP server

The screenshot shows a dropdown menu with a search bar at the top. The search bar contains the text "Mailgun" and has a magnifying glass icon on the right. Below the search bar, a list of email providers is displayed. The first item, "Mailgun", is highlighted with an orange background and has a checkmark to its left. Other items in the list include "Mandrill", "Postage", "Postmark", "SendGrid", and "SparkPost". The dropdown menu has a close button (X) and an expand button (upward arrow) in the top right corner.

## About the code

SlmMail is an "Integration of various email service providers in the Laminas\Mail". Since Tiki also already uses [laminas/laminas-mail](#), it is very nice extra functionality with minimal complexity/overhead. laminas/laminas-mail is the continuation of [Zend\Mail](#), which has been added to Tiki in [Tiki11](#) (2013).
