Tags: A tag is a mark in the current state of the Wiki. They can be used to save the Wiki at regular intervals and to recover the whole Wiki to a particular state if something disastrous occurred. To create a tag simply enter a tag name and click the **create** tag button. To restore a tag select one of the existing tags and click **restore** (*all your Wiki pages will be lost and the saved state for the wiki will be restored!*). Since tags can take a lot of space you can remove tags that you don't want to use by clicking the **remove** tag button after selecting the tag that you don't want to use anymore.
