Tags: A tag is a mark in the current state of the Wiki. They can be used to save the Wiki at regular intervals and to recover the whole Wiki to a particular state if something disastrous occurred. To create a tag simply enter a tag name and click the **create** tag button. To restore a tag select one of the existing tags and click **restore** (*all your Wiki pages will be lost and the saved state for the wiki will be restored!*). Since tags can take a lot of space you can remove tags that you don't want to use by clicking the **remove** tag button after selecting the tag that you don't want to use anymore.

Field	Description
Wiki Attachments	Specify if files can be attached to wiki pages.
Use Database to Store Files	If selected, files that are attached to wiki pages will be converted to BLOBS and stored in the Tiki database in the <b>tiki_wiki_attachments</b> table.
Use a Directory to Store Files	If selected, files that are attached to wiki pages will be stored in the specified directory. The directory can be an absolute path (such as <a href="http://www.foo.bar/attachments/">http://www.foo.bar/attachments/</a> ) or relative to the Tiki installation directory (such as <b>attachements/</b> ).

Field	Description
Wiki Attachments	This area lists all current attachments. You can use this area to change an attachments storage location to either Database to File.
