

## Module terminology

This is highly experimental and (for now) only useful for developers who want to contribute to Tiki.

This module is used for:

[http://profiles.tiki.org/Collaborative\\_Multilingual\\_Terminology](http://profiles.tiki.org/Collaborative_Multilingual_Terminology)

## Parameters

Support for multilingual terminology

[Go to the source code](#)

*Preferences required:* terminology\_profile\_installed

Parameters	Accepted Values	Description	Default	Since
<code>root_category</code>		All terms will automatically be put in that category. Note that the category must already exist. Defaults to 'Term'
