Spam on page doesn't allow to save new version ¿¿??

Posted by [Xavi \(as xavidp - admin\)](#) Sun 15 Oct, 2006 15:56 GMT-0000 posts: 33

I need some help.

I saw that some spam got into a page I documented a year ago (or so). I wanted to edit the page, delete spam, and save again, but I can't.

When attempting to view the page:

<http://doc.tikiwiki.org/tiki-index.php?page=Permission+Settings,ca>

I saw an empty page.

When I edited the page:

<http://doc.tikiwiki.org/tiki-editpage.php?page=Permission%20Settings,ca>

and re-added the content, I saw the page. But after reloading the content was not there.

And I couldn't view the new version in the history of the page (only the version created by system more than one year ago):

<http://doc.tikiwiki.org/tiki-pagehistory.php?page=Permission%20Settings%2Cca>

And when seing the wiki link to the page, referrerd from another one, I see the spam:

<http://doc.tikiwiki.org/tiki-index.php?page=Documentation%20Status%2Cca&refresh=1>

(something about "ring tones", etc., with html tags)

Any hints? (maybe spam is in field description?, wich is currently disabled, but present in db?)
